Our 64th Year

Kelly Bros. Nurseries
Dansville, N.Y.

William F. Kelly
President

John W. Kelly
Sec'y-Treas.

James B. Carmody
Vice-President

Dear Friends:

Another year of War and Privations has passed since you received our 1943 Catalog. A year in which we have all suffered the loss of friends and relatives, faithful employees and trusted companions.

With all the inconvenience of the shortage of help, the difficulty of getting supplies necessary to the conduct of our business, along with most unfavorable weather conditions, we have by the extra effort of our organization been able to keep up our Nursery plantings and handle your orders as efficiently as possible.

We will continue to grow as much nursery stock (mostly Fruit Trees and Fruit Bearing Plants) as the limits of our present facilities will accommodate, always making it our Business to see that the quality for which our Trees and Plants are well known, shall never lapse.

You have our assurance that, if you favor us with an order, it will receive our personal attention and you will receive plants with which you will be most pleased.

We especially want to thank the thousands of customers who favor us with their order each year (scores for as many as 30-40 years) and kindly recommend us to friends interested in Quality Nursery Stock. This Confidence is a source of great pride to us and we deeply appreciate it.

Cordially yours,

WILLIAM F. KELLY.

Lt. Edward T. Kelly
U. S. Army Air Corps

Lt. William F. Kelly, Jr.
U. S. Army F. A.

Edward (Tom) is serving with the Air Transport Command in India. Wm., Jr. is serving with the Field Artillery now stationed at Fort Bragg. Both having been trained in Horticulture at Cornell University are now serving their country and are anxious for the day that they may return and take their active part in our organization.

Important Ordering Information

ORDER FROM KELLY'S WITH EASE AND SAFETY

OUR REFERENCES

As to our responsibility and reliability, we refer you to the Merchants and Farmers National Bank, Dansville, N. Y.; Groveland State Bank, Groveland, N. Y.; Citizens Bank & Trust Co., Dansville, N. Y.; to any person whose letter appears in this catalog, or to your State Experiment Station or College.

ORDER EARLY

As soon as this Catalog reaches you please send in your complete order with definite shipping instructions. We then set trees aside until desired shipping time. If you prefer, leave the time of shipment to us and trees will reach you at the best time for planting in your locality.

PLANTING SEASON

Trees can be planted any time during their dormant period. We ship all Winter to Southern States, but our regular Spring shipping season opens about the first of March and continues well into June. Fall planting season begins about October 15th and extends until ground freezes solid.

RIPENING DATES

With our descriptions of varieties, we've indicated the approximate ripening date at which fruit is ripe and ready to eat in Western New York.

This date will vary with the season, and in different sections of the East. The fruit may ripen a few days to a week earlier or later.

USE ORDER SHEET

Please make your order out on order sheet enclosed. To avoid mistakes and delay write letters on a separate sheet of paper.

SEND CASH WITH ORDER

It is our cash with order—direct from nursery to planter—method of doing business that enables us to sell trees of the highest quality at such extremely low prices. Make remittances by post office or express money order, bank draft or registered letter. To large buyers, when satisfactory reference is given, we will ship C.O.D. provided one-fourth the amount of order is sent in cash when order is placed. We cannot accept orders for less than \$1.00.

BOXING AND PACKING FREE

We make no charge for boxing or packing. Prices, except as noted, are f. o. b. Dansville.

QUANTITY RATES

Take advantage of our lower rates for quantity purchases. For less than ten trees of any variety remit at each rate. A purchase of ten to fifty trees entitles you to the ten rate, and an order for fifty trees or more entitles you to the low hundred rates.

WE STRIVE TO AVOID MISTAKES

But in the event that any nursery stock sold by us should prove untrue-to-name under which it is sold, we hereby agree, on proper proof of such untruthness to name, to replace the original order or to refund the purchase price.

It Pays to Buy from Kelly's

Our nursery stock has the reputation of being the Best that can be grown, and it is our aim to keep it up to the standard in every way. The BEST is always the CHEAPEST. It is not what you pay, but what you get, that makes the bargain. Every purchase will prove to you the value of buying stock from us.

OUR GUARANTEE

We guarantee every tree or bush to be up to grade specified or better. We also guarantee arrival to customer in first class condition. If through delay or mishandling in transit, trees or bushes are not in first class condition on arrival, notify us immediately, and we will make prompt, satisfactory adjustment. Our trees are not sold by height only. We grade and sell our trees both by height and caliper, as we believe this is the only way of giving entire satisfaction to the planter. We strive to avoid mistakes, but should any stock prove untrue to name as sold, we agree, on proper proof, to replace stock, or refund purchase price. Our stock pleases or we cheerfully refund money advanced.

HOW TO PLANT

With every order we will send absolutely free a book which, by word and picture, will show just how to plant a tree or shrub. The instructions are clear, and if followed, your plants should grow and thrive. We send the 16-Page Revised Booklet FREE with your order acknowledgment.

POLLINATION OF FRUIT TREES

The value of pollination in the production of a fruit crop is now recognized. Although many varieties are self-fruitful and thus require no pollination from another variety, experiments show they are greatly benefited by cross pollination. Necessarily because of the lack of space available, we are only able to give brief notes on this important topic. For more detailed information, we suggest that you write to your State College or Experimental Station, the address of which we would be pleased to furnish on request. If you do not care to give attention to this detail, just write, stating the number of trees you wish to plant, and we will be pleased to be of service and suggest the best combinations.

WE GROW THE TREES WE SELL

When you buy from us, you are dealing with a Concern that has been in Business 64 years. We are large growers and have under cultivation over 500 acres of land, using the most modern equipment. We are proud of our employees—men and women—who have made the Nursery Business their life work and who are devoted to the high standards of Kelly's Trees and Plants.

Therefore you can see that we are able to sell Nursery Stock that is expertly Grown and Handled—not plants that have been handled and exposed many times before you receive them.

We are determined to supply our Customers the best Nursery Stock it is possible to produce—True-to-name, Free from Disease, and fully up to grade specified, at fair prices. You will accomplish much towards a successful crop when you plant our Nursery Stock. Ask any leading fruit growers in your locality about Kelly Trees.

Visitors are always welcome at our Nurseries and we consider it a privilege to have you call on us.

KELLY'S Apples

Whether you have room for only a few trees in your backyard, or plan to plant a large orchard . . . you'll get best results with **Kelly's Apples.**

We say this with confidence, because **our trees are grown under the most exacting conditions for your protection!**

Starting with a whole root seedling our trees are propagated by the budding method . . . the best and most expensive way. Each year we go direct to commercial bearing orchards, to cut our bud wood from trees that show the best color, and bearing qualities.

This is what gives **Kelly's trees** the good foundation that assures you of permanent, healthy growth, disease-free trees and heavy crops year after year. We recommend the following varieties as most profitable to the planter.

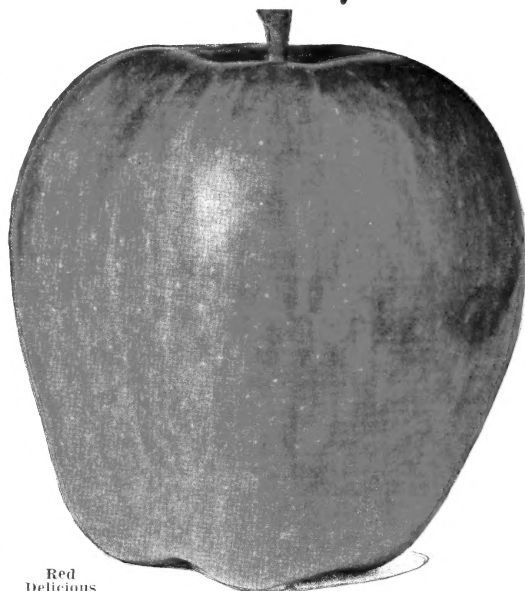

Months listed after description indicate the time at which the fruit is at its best for general use.

WRITE FOR PRICES ON LARGER QUANTITIES

Selected-Inspected

Red
Delicious

Yellow Delicious

A bright golden yellow Apple of excellent quality. Firm, crisp, and very juicy. Splendid keeper. Bears young and heavily. Many growers say this is the finest yellow Apple. *October to April.*

Red Delicious

**TENDER—
CRISP!
KING OF ALL
RED APPLES!**

A large, dark red Apple with crisp, fine grained flesh of excellent quality and flavor. A splendid keeper and shipper. Tree one of the hardiest. A vigorous grower with good foliage. A regular annual bearer. Excellent for eating, and the most popular fruit stand Apple. Packs well in boxes and bushels, always bringing high prices on the leading markets and in strong demand by the best trade.

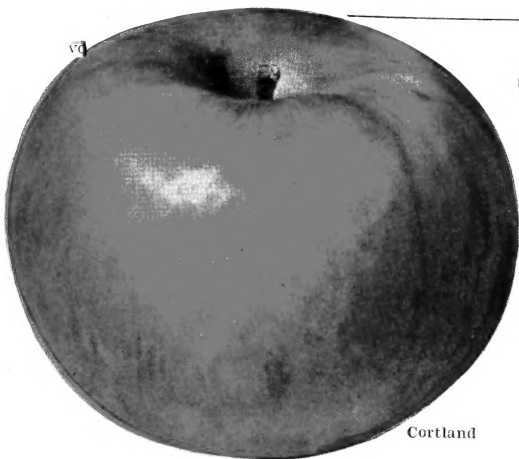

December-March

McIntosh Red

(SOLID RED STRAIN)

Without doubt the leading commercial variety of New York and the New England States. A very attractive red Apple of the highest quality. Hardy, bears young and annually. Flesh white, fine, very tender, juicy, and refreshing with attractive flavor. It is especially desirable for fancy trade. *October-January.*

Healthy, Heavy-Bearing, True-to-Name Trees

Cortland

Cortland A comparatively new Apple of the McIntosh type that combines the high quality and flavor of the McIntosh, the ability to stand handling of the Baldwin and tendency to hang to the tree of the Ben Davis. Should be planted extensively. An excellent variety to plant with McIntosh as a cross pollinator. The fruit of Cortland is as large or larger than that of McIntosh, round to somewhat conical in shape. In color it is a bright red, blushed with darker red, splashed and striped with carmine and more or less overlaid with a deep purplish bloom. *October-February.*

Macoun

A late McIntosh type Apple ripening about ten days later than McIntosh. Dark red with whitish close grained flesh. Fine quality. A heavy and regular bearer. Introduced and recommended by the New York State Experimental Station. *November.*

Macoun

Red Spy

A new red sport identical with Northern Spy except that the fruit is a solid bright red without either stripe or splashes. Much handsomer than its parent. An excellent commercial sort. Tree is hardy and productive.

November-April.

Grow CRAB APPLES

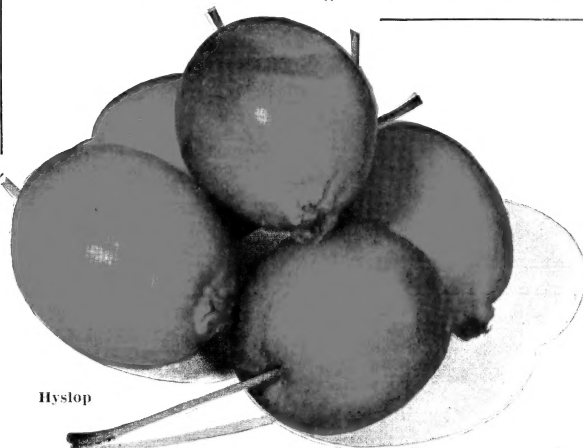

**FOR FRUIT AND ORNAMENTAL EFFECT
HYSLOP**

Fruit large, very brilliantly colored, dark red or purplish overspread with thick, blue bloom, borne in attractive clusters. The tree is a good grower, very hardy, and a reliable cropper yielding good crops biennially or in some cases annually. It is desirable both for home use and for market. One of the best known and most widely propagated varieties. *September 15-25th.*

DOLGO CRAB

A handsome red Crab Apple. Vigorous and productive. Very juicy, jellies easily, and makes a rich, ruby red jelly of beautiful color and excellent flavor. Makes exceptionally good cider. *September 1-10th.*

POLLINATION—Varieties such as McIntosh, R. J. Greening, Red Gravenstein and Northern Spy set little fruit without the assistance of an efficient pollinator. Good varieties to use for pollination are Cortland, Wealthy, Delicious, and Macoun. It is always best to plant two or more varieties to take care of this problem.

Hyslop

Red Spy

KELLY'S *Inspected* APPLE TREES

Summer Varieties

Descriptions indicate approximate date at which fruit ripens in Western New York

ANOKA (New). A new variety which bears prolifically 2 to 3 years after planting. Not a commercial variety in the East. Large, red striped, ripens soon after Yellow Transparent. *August 10th-15th.*

CARLTON (New). Desirable for home use and roadside markets. Annual bearer. Color and size similar to Red Astrachan. Flesh white. *August 20th-30th.*

Early Harvest

An old variety still holding popularity because of its large size and early bearing qualities. Fruit is pale yellow and of fine flavor. *August 1st-5th.*

LODI. A new fruit that closely resembles one of its parents, Yellow Transparent, but the fruits are larger and ripen a little later. An annual bearer that is becoming a commercial variety. Tends to bear young. *August 10th-15th.*

MELBA. A new McIntosh seedling from Canada. Fruit is attractive with bright crimson over pale yellow color. Good size and pleasantly flavored. Season shortly ahead of Early McIntosh, adapted for roadside stand and home. *August 10-15.*

RED ASTRACHAN. Tree hardy and good bearer. Fruit very handsome, large, round, nearly covered with deep crimson, overspread with thick bloom; juicy and good though rather acid. One of the best of the Summer varieties. *August 2nd-6th.*

RED DUCHESS. Red sport of Duchess. Bears at an early age, good size, juicy, subacid. Very hardy. *August 5th-10th.*

Sweet Bough

Large, pale yellow, sweet, tender, and juicy. Tree a compact grower and abundant bearer. One of the best early Sweet Apples. *August 12th-18th*

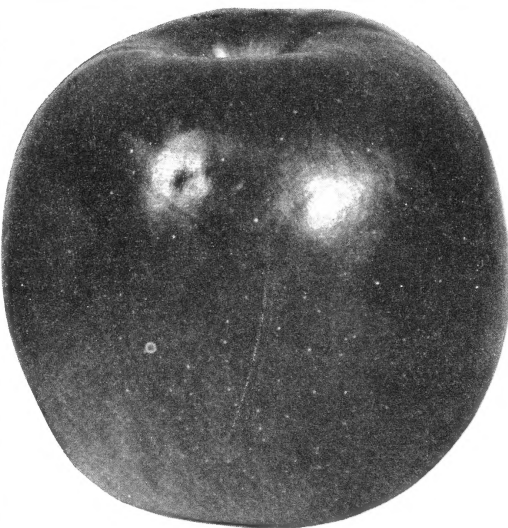

YELLOW TRANSPARENT. Tree upright and a very early and abundant bearer. Fruit of good size; skin clear white turning to a pale yellow; flavor acid and very good. *August 3rd-7th.*

Autumn Varieties

Descriptions indicate approximate date at which fruit ripens in Western New York

Early McIntosh

For home orchard or commercial use this is the ideal early variety to plant. Resembles its McIntosh parent with its handsome red color and uniform, round shape. The tree is a vigorous grower, hardy and productive. It is an annual bearer, and early thinning is recommended. Under favorable conditions of growth it comes into bearing at an early age. Besides pleasing the taste, this early Apple pleases the eye. The flesh is white, tender and juicy with fine flavor. Ideal dessert Apple. *August 15th-25th*

Early McIntosh

FALL PIPPIN. Very large, yellow, tender, juicy and rich. A general favorite as a Fall cooking Apple. Pleasant, aromatic flavor when eaten. Tree is vigorous, hardy, and productive. *September 15th-25th.*

Milton

This handsome new Apple of the McIntosh type ripens with Wealthy and a month before McIntosh. The tree is hardy, vigorous and an annual bearer. Color is beautiful pinkish red with heavy bloom. Flesh white with flavor more sprightly than McIntosh. *September 10th-20th*

POUND SWEET (Pumpkin Sweet). A very large, round, yellow, russet Apple. Very sweet and rich. Tree a vigorous, rapid, upright grower; valuable. *September 15th-25th.*

RED GRAVENSTEIN. A new red sport, much more attractive than its parent. Differs from the old Gravenstein only in the solid dark red color of the fruit. Should be planted in place of Gravenstein. *September 10th-15th.*

TWENTY OUNCE (Collamer). Very large yellow striped, red, fine quality Apple; good keeper. Tree vigorous grower, productive. *September 15-25th.*

WEALTHY. Beautiful, moderate sized, brilliant red Apple, fine quality, one of the best of its season; is relatively a good keeper. Owing to the hardness of the tree, its adaptability to cold climates and early bearing habits, can be profitably planted as a filler. *September 15th-20th.*

WOLF RIVER. Very large, yellow striped with bright crimson. Excellent for cooking and a long keeper. *September 10th-15th.*

Kelly Brothers Nurseries, Dansville, N. Y.

Gentlemen: I am very pleased with the fruit trees and shrubbery that I purchased from you and planted early last Spring, as all are growing nicely and appear healthy and vigorous. Your services have been of such nature and your merchandise of such quality as to justify me in recommending your firm to all my acquaintances in need of plants, shrubs, etc. I'm sure proud of the wonderful stock.

Yours very truly — EMMETT J. MURPHY

Winter Varieties

Months listed after descriptions indicate the time at which the fruit is at its best for general use

BALDWIN. Long a favorite with commercial orchardists for which no substitute has yet been found. Yields large crops and is an excellent shipper. Highly regarded as an eating and cooking apple, having a flavor all its own. Fruit is large, bright red, crisp, juicy, and rich. Tree vigorous and productive. *December-March.*

CORTLAND (See page 5 for description and illustration).

Double Red Delicious

A very fine colored, solid red strain of Delicious resembling its parent in all characteristics except color.
November-March

DELICIOUS, RED (See page 4 for description).

FAMEUSE (Snow Apple). Hardy, medium size, deep crimson, flesh is snowy white, tender, melting and delicious. Tree vigorous with dark wood; one of the finest dessert fruits and valuable for market. *October-December.*

GALLIA BEAUTY. An introduction from Ohio. This variety is an improved solid red Rome Beauty. Same shape and texture, but seemingly better quality. Truly a beautiful Apple that meets with good market demand. *December-May.*

GOLDEN Russet. Attractive, yellow russeted Apple. Long keeper. Tree a vigorous grower. *November-April.*

GRIMES GOLDEN. An Apple of fine quality. Fruit medium to large, bright yellow flesh. Juicy and fine flavored. Tree vigorous grower, hardy and productive. *November-February.*

JONATHAN. A beautiful red Apple, highly flavored and of excellent quality, being tender, juicy, spicy and rich—a splendid family sort and highly profitable for market. Tree long-lived, productive and an early bearer. *November-April.*

KENDALL. A new McIntosh seedling introduced and recommended by the New York State Experimental Station. Handsomely colored solid dark red. Fruit large with fine grained whitish flesh. Excellent quality and flavor. Ripens about the same time as McIntosh but keeps longer.

KING (Tompkins County). One of the largest red Winter Apples. Large size and attractive color makes it desirable for home use. *November-March.*

Lady (Christmas Apple)

A strikingly beautiful little Apple especially suitable for decorative use and for dessert. Brings high prices in the New York City markets. Trees prefer sandy or gravelly loam. Fruit is small, uniform in size and shape. Color—deep red blush with pale yellow ground color. *December-January*

LOBO. A McIntosh type of Canadian origin. Precedes its parent in season. Larger and darker red with more conspicuous dots. It is primarily adapted for Southern growers. *October-November.*

MACOUN (See page 5 for description and illustration).

MEDINA. An improved Delicious, ripening later and prolonging the season of that variety. Larger and more attractive than Delicious. *December-April.*

McINTOSH RED (See page 4 for description).

NORTHWESTERN GREENING. Tree a splendid vigorous grower, quite hardy. Fruit large green, becoming yellowish green when ripe. Subacid flavor. *October-March.*

Northern Spy

A leading commercial variety. Fruit is large and very attractive, being of bright red color with a pronounced bloom. Flesh is juicy, crisp, and excellent for dessert or culinary uses. Its fine reputation brings high prices in the market and the fruit is always in demand; fruit keeps well in storage until April or later.
November-April

ORLEANS. Another Apple of the Delicious type. Ripening about the same time as Delicious, but a longer keeper, more attractive, and larger fruit. Bears early, annually and heavily, and is resistant to scab. *December-March.*

OPALESCENT. Very handsome, large, dark crimson Apple. *November-February.*

RED ROME. Another new red sport of Rome Beauty, and like Gallia Beauty is identical with its parent in all characteristics except fruit is a solid red color. *December-May.*

RED SPY (See illustration and description on page 5).

ROME BEAUTY. Yellow and red striped apple of excellent quality. Prolific annual bearer. Early bearer and good keeper. Profitable commercial sort for New York, Ohio, Pennsylvania and West Virginia. *December-May.*

Rhode Island Greening

This large and superior Winter Apple is famous over a large extent of country, and is more highly prized for cooking and eating than any other variety. It is a good keeper, but will keep better if picked early. This Greening is a beautiful yellow color when ripe, and an abundant yielder.
December-April

SMOKEHOUSE. Yellow, mottled with dark red. A fine flavored dessert Apple. *October-January.*

SPITZENBURG. High flavored, dark red. *November-April.*

Stayman's Winesap

Fruit medium to large size. Skin smooth, slightly striped, coloring to dull red. Productive and early bearer.
December-March

SWEET DELICIOUS. One of the best Winter sweets. Large and attractive in size, color and shape. Recommended for a dessert and baking variety. *December-April.*

Tolman Sweet

Yellow tinged with red. Very sweet. Hardy and productive.
November-April

STATEMENT OF INSPECTION FOR TRUENESS TO NAME

Amherst, Massachusetts
August 26, 1943

To Whom It May Concern:

This is to state that all of the salable apple and sweet cherry stock now growing in Kelly Brothers Nurseries, Dansville, New York, have been examined for trueness-to-name by A. P. French, O. C. Roberts, and L. Southwick. To the best of our knowledge and belief these trees are true to name as they now stand in the nursery rows.

The salable peach trees in this nursery were also examined and any mixtures observed were rectified. While it is impossible to positively identify all peach varieties in the nursery row, it is possible to eliminate a high percentage of the mixtures.

J. K. SHAW
Research Professor of Pomology

SWEET McINTOSH. Resembles McIntosh in appearance, flavor and aroma. Good for baking and eating out of hand. *October-January.*

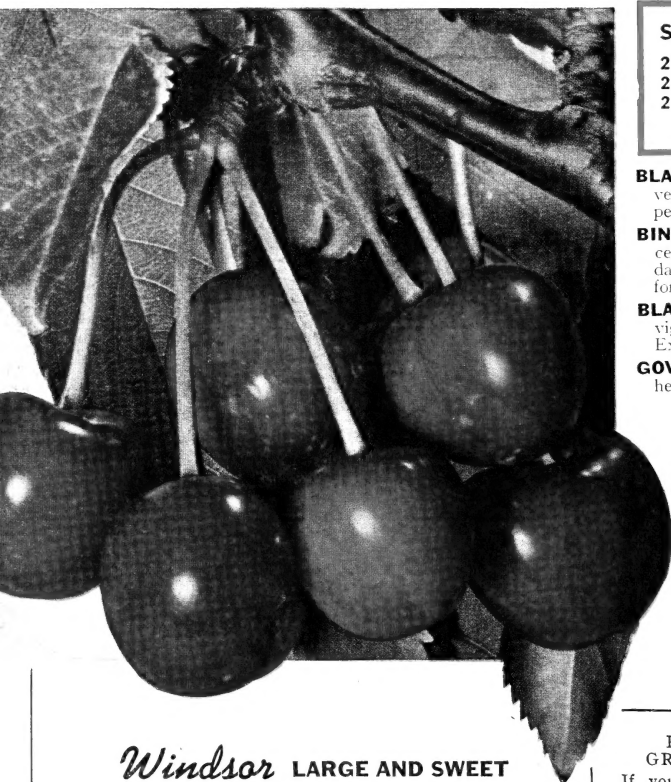

WINTER BANANA. Beautiful pale yellow apple with bright pinkish blush. Excellent quality. Prolific and an early bearer. *November-February.*

YELLOW DELICIOUS (See illustration and description, page 4).

St. James, N. Y.
Kelly Bros. Nurseries, Dansville, N. Y.
Gentlemen: I received my shipment of Peach trees on Tuesday. They were in very good condition and I am very well pleased with the trees. I certainly appreciate your prompt shipment. Very truly yours,
ELLIS WINTERS, JR.

*Sturdy Upland-Grown Trees from
one of the Nation's Largest Growers*

Kelly's

Windsor LARGE AND SWEET

Fruit very large, juicy, and firm; flesh pinkish and sometimes streaked. Good quality; excellent bearer. Tree upright, vigorous, and rapid grower. Popular for its large size and dark color; almost black. One of the leading commercial sorts. *July 20th to 26th.*

Napoleon (Royal Ann)

CHOICE SWEET YELLOW CHERRY

Good for market and canning. Large size, beautiful Cherry, pale yellow with bright red cheek; sweet, juicy and firm. The leading white, sweet Cherry. *July 7th to 10th.*

POLLINATION

Sweet Cherries are self-unfruitful, so must be interplanted. Where Napoleon, Bing, and Lambert are to be planted together, another variety such as Windsor or Black Tartarian must be added as the first three will not pollinate each other. The Sour varieties are self-fruitful.

SWEET CHERRY TREES

	1-9 Each	10-49 Each	50-300 Each
2 Year, 5-6 feet, 11/16 and up...	\$2.00	\$1.75	\$1.25

2 Year, 3-4 feet, 7/16-9/16.....	1.50	1.25	.85

Write for prices on larger quantities

BLACK TARTARIAN. Very large, bright purplish black; juicy; very rich. Tree a remarkably vigorous and erect grower, dependable bearer and regular producer. *June 30th-July 4th.*

BING. Tree very hardy, and vigorous, with heavy foliage. It succeeds in the East better than most sweet varieties. Fruit is large dark brown or black, fine quality, delicious. Good shipper, ideal for commercial purposes. *July 5th to 10th.*

BLACK GIANT. One of Burbank's introductions. Tree large, vigorous and very productive. Large black fruit late in season. Excellent quality. *July 14th to 18th.*

GOVERNOR WOOD. Fruit light yellow marbled light red; large, heart-shaped, rich sweet and juicy. Productive. *June 24th.*

LAMBERT. Purple red in color, rich and firm. Considered one of the largest of all Cherries. Enormous crops every year. Tree grows well and is proof against fungus and insect attacks. Fine shipper. *July 18th to 25th.*

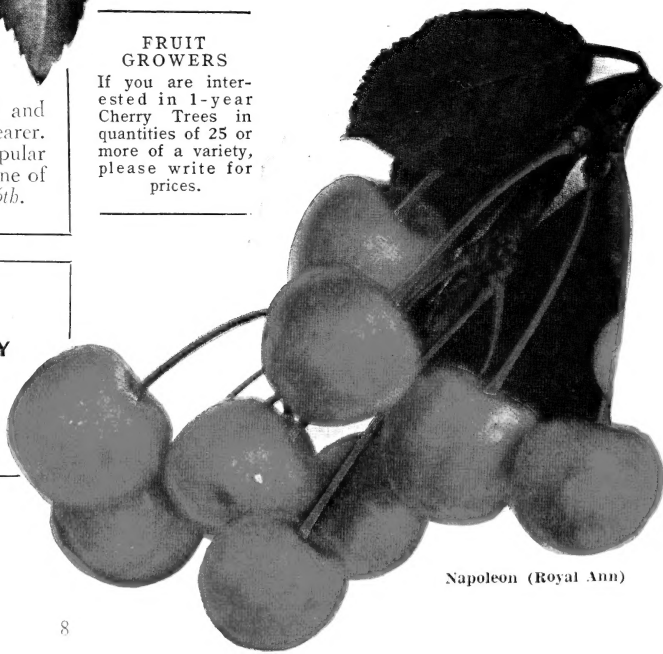

SCHMIDT'S BIGGAREAU. Large size fruit of deep mahogany color. Flesh dark, very juicy, tender and has fine, rich flavor. An excellent shipper. Fruit grows in clusters. *July 10th.*

SENECA. Similar to Black Tartarian in color and size, which it precedes by two weeks. Trees hardy and prolific. *June 10th to 15th.*

YELLOW SPANISH. Pale yellow with bright red cheeks. One of the best, most beautiful and popular of all light colored Cherries. Productive. *June 30th to July 4th.*

FRUIT GROWERS

If you are interested in 1-year Cherry Trees in quantities of 25 or more of a variety, please write for prices.

EARLY RICHMOND. The good old variety that bears such large crops in the gardens. Most hardy of all varieties uninjured by severest Winters. One of the most valuable and popular varieties, unsurpassed for cooking purposes. Tree slender in growth with a roundish, spreading head. Ripens through June and bears good crops. *June 25-30.*

Home Canners

CHERRY COLLECTION

Best varieties for pies and desserts; fruit over a long season. All ideal for home canning.

1 Early Richmond

1 Large Montmorency

1 English Morello

All 3, 2-yr. 4-ft. trees, \$3.50

Ocott, N. Y., April 26, 1943

Kelly Bros. Nurseries, Dansville, N. Y.
Gentlemen: My order of nursery stock arrived the day before your notice of shipment and I was very much pleased to learn that it was well packed for any delay in transit. We have had a very late Spring, so I left it packed until it could be planted. Everything that I had ordered was there and in good condition apparently, and if I can find anyone that doesn't know that your firm is thoroughly reliable, I will be glad to recommend you to them.

Yours truly,
CECIL AVERILL

ENGLISH MORELLO. Fruit large, elongated, almost blackish red when fully ripe; very rich, acid; juicy and good. A splendid pie Cherry. Tree very hardy, somewhat smaller than other sorts, but exceedingly productive. This fruit is in great demand by fruit juice manufacturers. *July 20-30.*

Large Montmorency BEST PIE CHERRY

Fruit is good-sized, fine flavored and bright clear red. The canning factories are always calling for them and buy them by the hundreds of tons. The best of all sour varieties; is a good shipper, very attractive and always brings good prices. The trees are the cleanest and best growers and are less subject to disease, less affected by wet weather, and are the best bearers of all other sour varieties. Montmorency can always be depended upon for a crop, no matter how unfavorable the season may be. Montmorency is the nation's most popular sour Cherry. Whether preserved at home, or commercially, it retains fine color and quality.

July 15th

Hansen

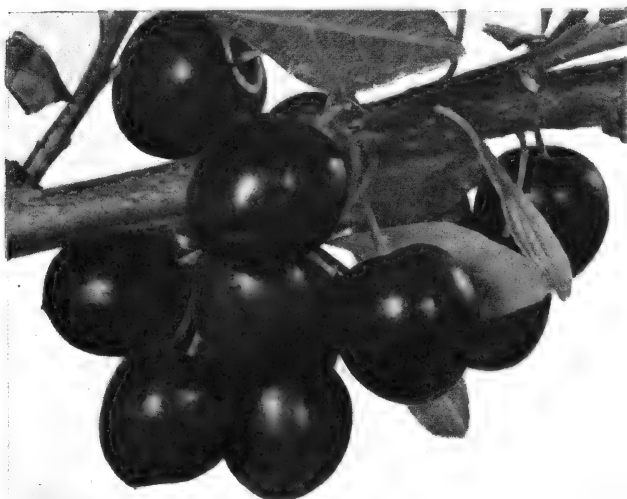

IMPROVED BUSH CHERRY

An ornamental shrub, producing delicious fruit. Very easy to grow, highly productive and hardy. The fruit is large, black and sweet, wonderful to eat right from the bush. Introduced by Dr. Hansen of the South Dakota Experimental Station. Leaves are silvery green, turning red in Autumn. Attractive white blossoms add to landscape effect.

Dates after each description indicate approximate picking date in Western New York. Months indicate time at which fruit is ripe and suitable for home consumption.

ANJOU. Is a vigorous grower, hardy and prolific; the Pears are of large size, green in color, yellow when ripe. Very juicy, luscious and of best quality. Best for late Fall and very early Winter use. *October to January. (Sept. 25th)*

Bartlett

Justly the leading commercial Pear—a leader among canning Pears. Fruit is large, golden yellow in color with a reddish blush on the sunny side. Flesh is tender and juicy, with a delicious musky flavor. Tree is a vigorous, erect grower and bears abundantly. *September - October (Sept. 1-10th)*

POLLINATION

Two varieties are needed. The only combination that is cross-incompatible is Seckel and Bartlett. A third variety is needed with the above two.

Clapp's
Favorite

CAYUGA (New). A new seedling of Seckel which it resembles in shape and color. Fruit is as large as Bartlett and of high quality. *September and October. (September 15th-20th)*

Clapp's Favorite

Large, fine, pale lemon-yellow, with brown dots; fine texture, melting, buttery, juicy, with a rich, sweet, delicate, vinous flavor. Tree hardy and very productive. Thrives where other varieties fail.

August (August 15th-20th)

DUCHESS D'ANGOULEME. A most dependable cropper often fruiting the first season after planting. Fruit large. A dull greenish yellow, spotted russet, flesh white, rich and good quality. *November to December. (September 25th-30th)*

FLEMISH BEAUTY. One of the hardiest and most generally successful over a wide range of country, producing good crops annually of large, handsome fruit of good quality. *September and October. (September 20th)*

GORHAM (New). Resembles Bartlett in size, color and shape. The flavor is sweet and vinous with a very marked and pleasing aroma. Trees vigorous and productive. *September to November. (September 10th-25th)*

KIEFFER. Large to very large. Skin yellow with light vermillion cheek. Flesh very juicy with a marked musky aroma. Good quality. *November to February. (October 1st-10th)*

SECKEL. A delicious little Pear that is the standard of excellence in its class. One of the richest and highest flavored Pears known. Yellowish-brown with red cheek; very productive. *September and October. (September 20th-25th)*

SHELDON. Large, round, russet and red Pear. Very rich and delicious. *October. (September 20th)*

WILLARD (New). One of the best Winter Pears. Recommended for its high quality and lateness. Has shape and color of Bartlett. Flesh is yellowish, fine grained, tender and juicy. *December-March. (October 1st-10th)*

WORDEN SECKEL. Fruit larger than Seckel. Shaped like Bartlett but not as large. Yellowish brown with red cheek. Excellent quality. *September and October. (September 20th-25th)*

Bartlett

Beurre Bosc

Very popular variety. Very large, gourd shaped Pear, brownish yellow in color. Hangs to tree well on account of its long stem which allows it to sway in heavy winds. White flesh, rich and delicious.

*October to January
(September 25th-30th)*

Bosc

PLUMS AND PRUNES

PLUM TREES

	1-9 Each	10-49 Each	50-300 Each
2 year, 5-6 feet, 11/16 and up	\$1.75	\$1.50	\$0.95
2 year, 4-5 feet, 9/16 to 11/16	1.60	1.35	.85
2 year, 3-4 feet, 7/16 to 9/16	1.40	1.20	.75

No other fruit tree, unless it is the Cherry, produces more abundantly than a Plum tree. In general Plum trees thrive best in a sandy or clayey soil. We can recommend to the planter the following varieties. *Dates indicate approximate ripening time.*

EUROPEAN VARIETIES

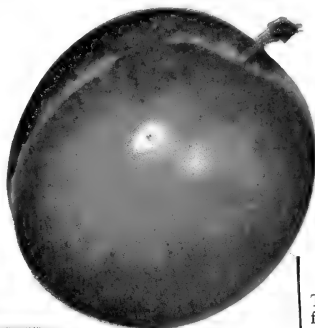

ALBION (New). Fruit larger and of better quality than Grand Duke which it resembles. Tree vigorous. One of the best new introductions. *Very late.*

BRADSHAW. Large, fine early Plum, dark violet red, juicy and good. Very productive; valuable for market. Quality is excellent, color attractive. Good canner. *Sept. 5 to 10.*

FELLEMBERG. A valuable Plum for dessert, but most esteemed for market and drying or preserving. Fruit long, oval, purple with a thick bloom; flesh firm, sweet and pleasant, separating freely from the stone; moderate growth. A great favorite. A sure market for all you have to sell at very profitable prices. *Sept. 24-26th.*

IMPERIAL EPINEUSE. An old French Plum of the Prune type. Reddish purple, tender, sweet, juicy and one of the best flavored Plums. Ideal for home garden. Tree a wonderful grower. Requires cross-pollination. *Sept. 1 to 6.*

LOMBARD. Medium to large, roundish, dark red. Flesh yellow, juicy; hardy, prolific bearer. Valuable commercial sort. *Sept. 18 to 22.*

Burbank

NEW Stanley Prune

A STAR PERFORMER

The best for commercial planting or home use. Bears fruit in three years and ripens 10 days earlier than other varieties, exceptionally productive. Fruit large, deep bluish purple, firm and sweet; of excellent flavor. Introduced by the N. Y. State Experimental Station, and is becoming a valuable commercial variety. Bears annually. Midseason. *Sept. 20 to 25.* Same price as other Prune trees.

MONARCH. Very large, bluish-purple. Juicy, golden green flesh. Bears early and abundantly. Excellent for market. *Sept. 18 to 22.*

REINE CLAUDE (Bavay's Green Gage). Large, pale yellow marked with red; good bearer. *Sept. 25 to 30.*

SHROPSHIRE DAMSON. Medium size dark purple fruit produced in thick clusters. Excellent canner. Tree a good grower and very productive. *Sept. 24 to 28.*

YELLOW EGG. Golden yellow covered with thick bloom. Tree large, very productive. *Sept. 22 to 25.*

GERMAN PRUNE. Fruit long, oval, purple with thick bloom. Flesh firm, sweet, and delicious. Excellent commercial sort. Freestone. *Sept. 18 to 22.*

YORK STATE PRUNE. One of the largest and best. Dark blue with purple bloom. Delicious. *Sept. 24 to 26.*

ORIENTAL VARIETIES

ABUNDANCE. Fruit large, very early; amber turning to a rich, bright cherry. Flesh light yellow, exceedingly juicy and tender. Freestone. Excellent for canning. *Aug. 15 to 20.*

BURBANK. Fruit is very large, bright reddish purple. Meaty and quite firm. Excellent shipper. Tree hardy, vigorous and productive. Needs close pruning. *Aug. 25 to 30.*

FORMOSA. A midseason variety of excellent and prolific bearing qualities. Large, greenish yellow, overlaid with red. Alternate bearer. Heavy cropper. *Aug. 20 to 25.*

RED JUNE. Ripens before Abundance. Medium to large; deep vermilion-red; flesh light lemon yellow; fine quality. Vigorous, hardy; productive. *Aug. 1 to 7.*

SANTA ROSA. A proven money maker. One of the best of the Oriental varieties. Resembles Burbank in size and color. *Aug. 20 to 26.*

POLLINATION

With the exception of the Prunes, Fellemberg, German, Stanley, etc. which are self-fertile, Plums should be interplanted to insure a set of fruit—European varieties for pollinating that class and Oriental sorts for those varieties.

Peaches *The Best Yield, Flavor,*

Peaches can be grown on any soil that will produce the average yield of farm crops and are especially adapted to the lighter soils. Careful cultivation and intelligent pruning will work wonders in the production of Peaches. If properly cared for, the trees are sure to bring in a handsome return on your investment. As in other fruits it is imperative, however, that your trees are of the best stock. It is very important that wood growth on Peach trees is well ripened and that they have a good and sufficient quantity of fibrous roots, so they will withstand the hot sun and drought that may occur after planting. We have a very good stock of hardy trees with well ripened wood and an excellent root system, and we make the lowest possible price consistent with the quality of the stock.

Dates after each description indicate approximate ripening season in Western New York. Season varies in different sections of the East, but this will give you an approximate idea when to expect the fruit to be ripe

PEACH TREES	1-9	10-49	50-300
	Each	Each	Each
1 Year, 4-5 feet, 9/16-11/16.....	\$1.00	\$0.85	\$0.60

ELBERTA... *The Money Maker*

The leader of all Peaches and the greatest commercial variety on the market; 50% of the Peaches planted are Elberta. In all probability no Peach will succeed over so wide a range of territory as this kind. It will thrive where any Peach can be grown. A beautiful Peach of good quality, not only the best orchard variety but also valuable for planting in the garden. Elberta is hardier in bud than many varieties, therefore, a more uniform cropper. It is large, yellow, with red cheek, juicy, and high flavor; flesh yellow, freestone. Season medium early following quickly upon Early Crawford. *September 15th-20th.*

HALE HAVEN

Marvelous new Peach, a result of crossing the famous J. H. Hale with South Haven. A large, beautifully colored, yellow fleshed Peach, ripens approximately 10 days to 2 weeks ahead of Elberta. Perfect freestone, strong grower, good shipper, and a prolific heavy bearer. The tree is hardy and fruit is of the highest quality. Has extremely high color which is present several days before the fruit ripens, thus allowing early picking for distant shipments. Should be included in every planting

Varieties for Quality and Profit

BELLE OF GEORGIA. Large, attractive white-fleshed Peach. Red cheek. Hardy and productive. Freestone. *September 3rd-7th.*

CARMAN. Large, white fleshed Peach of fine quality. Very hardy and productive. Freestone. *August 28th-September 2nd.*

CHAMPION. Large creamy white with red cheek. Excellent quality. Good shipper. Hardy and productive. Freestone. *September 5th-8th.*

CRAWFORD'S EARLY. Large yellow Peach of the finest quality and flavor. Freestone. *September 6th-10th.*

CRAWFORD'S LATE. One of the finest late varieties. Large, yellow, of excellent quality. Freestone. *September 25th-28th.*

CUMBERLAND. A recent introduction of the New Jersey Experiment Station as a result of a cross between Belle and Greensboro. Vigorous grower and as hardy as Carman. Fruit is large, attractive in color and shape. Flesh is white and almost free. *August 18th-23rd.*

EARLY ELBERTA. An excellent new variety resembling Elberta very closely, except a little rounder in shape and about 10 days earlier in ripening. Freestone. *September 6th-10th.*

GREENSBORO. Large, bright red over yellow, flesh white. Good quality. Freestone. *August 5th-10th.*

J. H. HALE. An extra large Peach, yellow overlaid with crimson. Flesh golden yellow, of delicious flavor. An excellent shipper. A fine commercial variety. Prolific when cross pollenized with some other variety. All of the varieties offered in this catalog are suitable for planting with Hale. Freestone. *September 17th-21st.*

MARIGOLD. Early yellow, excellent quality, semi-cling. *August 12th-17th.*

MIKADO. The most popular, very early yellow. Hardy, productive. Ripens about six weeks ahead of Elberta. Blossoms self-sterile, needs to be interplanted. *August 3rd-8th.*

ORIOLE. A new early Peach of high quality. Fruit medium to large in size, yellow fleshed and a Freestone. Trees vigorous and productive. *August 15th-20th.*

ROCHESTER. A comparatively new extra early Peach of the highest quality and most delicious flavor. Large yellow with attractive red blush. A very fine canner, prolific, and an early bearer. Freestone. *August 29th-September 3rd.*

SHIPPER'S LATE RED. A rather new late variety that is fast becoming prominent. Ripens a few days after Elberta. Large yellow flesh, attractive, highly colored freestone Peach. Of J. H. Hale type. Ours is the true strain. Buds cut from checked bearing orchards.

SOUTH HAVEN. Another excellent new Peach, well worth planting. Golden yellow with red blush. Large, meaty, and of delicious flavor. Prolific. Freestone. *August 25th-September 1st.*

VALIANT. Large, yellow Freestone. Juicy, very good quality. Excellent producer and fine canner. Quite hardy in bud. An introduction from Canada. *August 28th-September 5th.*

VEDETTE. Ripens a few days before Valiant, and three weeks before Elberta. Fruit is large, roundish oval, yellow fleshed, and a freestone. Superior quality and color. *August 25th-30th.*

VETERAN. Large, round, yellow fleshed fruit. Freestone. Since it ripens a few days later than Valiant, it makes a desirable sort to follow that variety. *August 30th-September 4th.*

RED HAVEN

A new, medium-sized early Peach that has been thoroughly tested and found highly satisfactory. Introduced by the South Haven Experiment Station, it has the fine flavor of the South Haven and Hale-Haven. When other early Peaches are still green this Peach is a bright red and ready to ship before it is fully ripe. A Peach to plant for real profit.

Hardy, freestone, self-pollenizing and a prolific yielder.

August 20th-25th

The Sensational GOLDEN JUBILEE

We recommend this New Jersey Experiment Station introduction. Comparatively new, but widely planted; is a real money maker. Unusually hardy, resists excessive cold. Sure cropper, after severe Winters and heavy frosts. Golden Jubilee is without equal as an early, large, yellow freestone of highest quality. Flesh is yellow, tender, juicy and sweet.

August 20th-25th

Photograph of a block of Kelly's Peach Trees taken October 1, 1943, showing trees ready for digging. Note the exceptional growth which is your assurance of thrifty, early-to-bear trees

POLLINATION

With the exception of Mikado and J. H. Hale, all the varieties we offer are self-fruitful

TRUE-TO-NAME

All Kelly Peach trees inspected by Dr. A. P. French and associates of Massachusetts State College. See statement page 7.

Kelly Brothers Nurseries, Dansville, N. Y. Oconomowoc, Wis., May 5, 1943

Gentlemen: Satisfaction—when it is truly genuine is the type of philosophy expressed by Briggs—"What a grand and glorious feeling!" The Nursery stock arrived in perfect shape and it is excellent. It is everything that you said it would be and we are more than satisfied.

Very truly yours—C. W. AEPPLER COMPANY

DWARF TREES

FRUIT ON DWARF TREES LARGER THAN ON STANDARDS

The fruit produced by dwarf trees is the same color and quality as that produced by standard trees but may average larger in size. For those who enjoy working with plants, there is a source of much pleasure in dwarf fruit culture, watching the fruit take shape and ripen over the season. Be sure to plant more than one variety to insure pollination.

Dwarf Apple Trees

BUDED ON NEW MALLING ROOTSTOCK

Our Dwarf Apple Trees are budded on the New Malling dwarf rootstock introduced recently to this country by Dr. H. B. Tukey of the New York State Experiment Station. Now you can have several varieties growing in your yard because of the small space required. 15 x 15 is a recommended spacing.

This year we offer trees budded on Malling I rootstock only—trees at maturity reach a height of 10 to 15 feet

Cortland	Red Delicious
Red McIntosh	Early McIntosh
	Baldwin

Select, 2½ to 3½ feet trees—each \$3.50, 3 for \$9.00

PLEASE NOTE

We have placed a limit of three Dwarf Apple trees to a customer as the supply is very limited and we wish as many of our friends as possible to enjoy these fine trees. We request the privilege of substituting an equally good variety should we be sold out of the varieties ordered.

In the Spring the trees are attractive with their branches laden with colorful blossoms and when they fruit in the Fall you will be delighted with the full-sized, tasty and attractive fruit.

Dwarf Apple Tree, Early McIntosh

Full Sized Fruits and Lots of It From These Trees!

Dwarf Pear Trees

The fruit is very easy to pick as the trees are low headed, and it is not necessary to wait long for returns as they come into bearing very early, usually the second or third year after planting. Pears are dwarfed by budding on Quince Stock. The illustration at the left shows a Dwarf Bartlett Pear tree with a load of fruit the first year after being set out. We receive scores of such photographs from customers every year. We know you will enjoy seeing these trees grow and fruit while they are so young.

VARIETIES THAT GROW BEST AS DWARFS

All varieties of Pears do not give good results as Dwarfs. We recommend the following varieties to be good growers and bearers and to give the best satisfaction as Dwarfs. For best results, plant two varieties:

BARTLETT	DUCHESSE	CLAPP'S FAVORITE	SECKEL
-----------------	-----------------	-------------------------	---------------

Prices of Dwarf Pear Trees

	Each	10
2 Year—3 to 4 feet	\$2.50	\$2.25
2 Year—2½ to 3½ feet	2.00	1.75

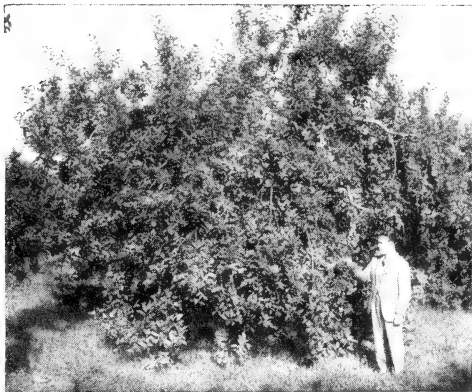

Dwarf Bartlett Pear Tree
With fruit the first year planted

NECTARINE-Sure Crop

Sure Crop was imported from New Zealand by the United States Department of Agriculture and so far is the most promising Nectarine at the New York Experiment Station. The tree is vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red. The flesh is firm, tender, free from the stone, and very pleasing in flavor; late midseason. If only one Nectarine can be grown, Sure Crop should be selected.

Large, 4 to 5 feet.....\$1.75 each, 3 for \$4.50
Large, 3 to 4 feet.....\$1.60 each, 3 for \$4.00

← This photograph of Mr. M. E. Buckman was taken October 10th in the famous Sedus Fruit Farms Orchards, of which Mr. Buckman is Manager. The front cover illustration was taken at the same time. This is one of the largest of the fruit farms in the celebrated Wayne County, N. Y. fruit section on the shores of Lake Ontario. We are privileged to supply high quality, true-to-name fruit trees to many of these well-known orchards

KELLY'S SMALL FRUITS

WILDER CURRANT

Recommended as Best Commercial Variety
Extra Strong, 2-Year Bushes, 30c. each, \$2.75 per 10,
\$20.00 per 100

WILDER. An unsurpassed commercial sort. Bunches and berries very large, bright attractive red. Hang on bushes well and of excellent quality. Productive.

Write us for special prices on large quantities

RED LAKE CURRANT

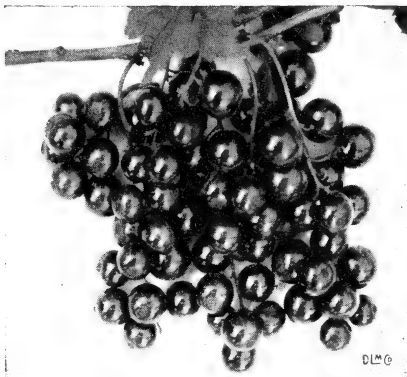

The new giant red Currant. The berries are a pleasure to pick, being large, dark red in color, and on long, well filled branches. Very hardy. Ripens over a long season. Supply limited.

2-Year, No. 1 Plants—45c. each, \$4.00 per 10,
\$35.00 per 100

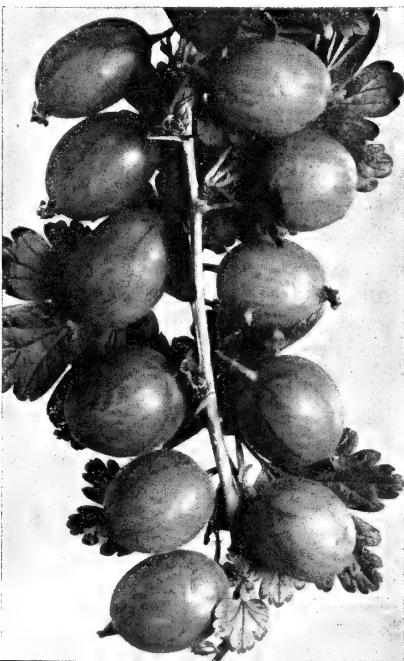

Dewberry Lucretia

Of the Blackberry type, but produced on a trailing vine instead of an upright bush. The fruit is earlier, larger, attractive black, firm, and of very good quality. Plants are disease resistant. Excellent for canning.

Each....\$0.15
10 for...\$0.95
50 for...\$2.75
100 for...\$4.85

Wilder Currant
Downing Gooseberry

Gooseberries

DOWNING. A medium size, whitish green Gooseberry of good quality. Strong, upright grower and quite prolific. Midseason. (July 10th to 15th).

POORMAN. Fruit is largest of any of the American Gooseberries. Attractive red color. Prefers a heavy type of soil.

RED JACKET (JOSSLYN). Light red, medium size, excellent quality. Vigorous upright grower, healthy and productive.

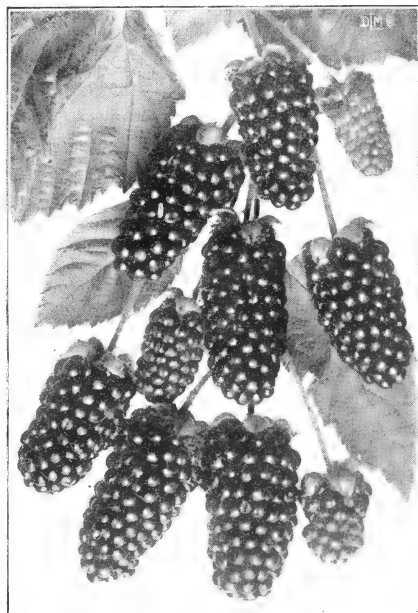

Prices of Select, 1-Year Bushes
65c. each, 3 for \$1.80

IMPORTANT!

When ordering Currants or Gooseberry plants, it is necessary to have the following information:
1. County and Township where planting is to be made.

2. Approximate distance from nearest stand of White Pine (Five Needled Pine).

If you do not receive the Currants or Gooseberries with your order, you will know we are holding them for the permit, and if the permit is not granted refund will be mailed.

Lucretia Dewberry

Raspberries

Prices, except as noted:

10 for \$1.50, 25 for \$2.75, 100 for \$8.25,
500 for \$29.50, 1000 for \$55.00

BRISTOL (Black). Wonderful new Black Raspberry from New York Experimental Station. Really one of the best varieties being propagated. Berries are large, firm, fairly glossy, attractive and of excellent quality. *July 3rd to 6th.*

CUMBERLAND (Black). Large, glossy, black, firm, of excellent quality. Hardy and productive. *July 5th to 10th.*

COLUMBIAN (Purple). A fine commercial sort. Vigorous, very productive, excellent canner. Fruit large, purple, firm. *July 10th to 12th.*

Indian Summer

New, Everbearing Red Raspberry

Berries large, conical, much superior in quality and size to any of this type. *June 28th to July 1st. September 15th to freeze.*

10 for \$1.80, 25 for \$3.30, 100 for \$9.75,
500 for \$35.00, 1000 for \$65.00

LATHAM (Red)

The best known of all the Raspberries, not only because of its extreme hardiness in all sections of the country, standing to 45 degrees below zero without damage, but also because its fruit will stay on the bush for quite a few days after it has ripened.

The fruit is usually around an inch in diameter. No better or versatile berry can be found because it is excellent for fresh fruit, sauce, pies, canning and for drying. Aptly named the Queen of the berry patch. *July 6th to 10th.*

MARCY (Red). First introduced in 1936, this variety is fast gaining in prominence. Desirable for market and home use. Good quality, vigorous, productive. *July 3rd to 7th.* 10 for \$1.80, 25 for \$3.30, 100 for \$9.75, 500 for \$35.00, 1000 for \$65.00.

NAPLES. A new, hardy, mosaic free, productive Black Raspberry, resistant to disease. Fruit large, firm, attractive, and of good quality. *July 10th to 12th.*

NEWBURG (Red). A new variety of excellent color and quality. Very large and firm. Fine keeper and shipper. Vigorous, hardy, and very productive. *July 4th to 6th.*

SODUS. New purple Raspberry from New York State Experimental Station. Fruit is large, firm medium purple color and does not crumble; plants hardy and very productive. *July 10th-12th.*

Taylor

A new Red Raspberry, introduced by the New York State Experimental Station. Plants are vigorous, hardy, and productive. Long, conical shape, firm, thick flesh. Excellent quality. Ripens just before Latham. *July 8th to 12th.*

Kelly Brothers Nurseries, Dansville, N. Y.

Plainfield, N. J., April 26, 1943

Gentlemen: This is to advise you that I received my order of berry plants, shrubs, and fruit trees on April 16th in good order. I planted all immediately on arrival, today 10 days after transplanting all my berry plants have sprouted and are covered with tiny new leaves. The Strawberry plants all have 2 sets of new leaves on them and they are about 2 1/2 inches above ground. Did not lose a single plant. The fruit trees are healthy, and all growing. All in all they were a very healthy lot of trees and plants that you sent to me and I am very much satisfied. You can rest assured that I will not hesitate to recommend my friends and neighbors here in Plainfield to you.

Yours very truly -F. M. HARTMAN

Answers to the 31 Questions

MOST COMMONLY ASKED BY THE AVERAGE PERSON BUYING NURSERY STOCK.

Compiled by our staff in cooperation with Dr. H. B. Tukey of the Geneva, N. Y. Experiment Station. Please read before ordering or asking for information. If your question is not answered here, write on a sheet of paper separate from the order blank. Additional planting and cultural information is contained in the Planting Guide we send you free.

1. Q. When is the best time to plant nursery stock?

- A. Either Fall or Spring, though early Spring is preferred by many. Fall Delivery season starts about October 15th and extends through to severe freezing of the ground. Spring delivery season starts March 15th and extends to June 1st. In our modern cold storage, we can keep plants dormant until the latter date.

2. Q. How long before my fruit trees will bear some fruit?

- A. This depends on the variety, but on the average we have found the following to be quite true:

2 yr. Apples
Cortland, Early McIntosh
Red McIntosh
Northern Spy
2 yr. Pears
2 yr. Plums
2 yr. Sour Cherry
2 yr. Sweet Cherry
2 yr. Quince
1 yr. Peach

AFTER PLANTING

2-3 yrs.
3-4 yrs.
5-7 yrs.
3 yrs.
2-3 yrs.
2-3 yrs.
3-4 yrs.
1-2 yrs.
2-3 yrs.

3. Q. If I plant Asparagus in the Spring (Example) 1944 when can I harvest the first crop?

- A. You could cut some Asparagus in 1945, but the first big crop would be in 1946.

4. Q. Can I grow Quinces and Apricots?

- A. Generally speaking, Apricots, though not a commercial crop in the East, will grow where peaches do well. If you can grow cherries, Quinces will grow there.

5. Q. What are Bearing Age trees?

- A. The Bearing Age Trees we offer are large three- or four-year old trees whose roots were pruned when they were two-year old trees. The result is a strong fibrous root system that insures successful transplanting and early fruiting.

6. Q. Will you tell me how to spray my trees and what to use?

- A. Recommendations vary for the different States or localities. Your State Experiment Station has a free bulletin on the subject. See list of Stations and addresses under Question 15. A general home orchard spray which Dr. Tukey has found successful in his own home orchard is as follows:

Mix the three following powdered materials:	
Wettable Sulfur	5 lbs.
Lead Arsenate	2 lbs.
Rotenone	3 lbs.

TOTAL 10 lbs.

This amount is for mixing with 100 gallons of water. Accordingly for convenience put up in 10-lb. lots in small paper bags or glass jars, and use a 1-pound lot with each 10 gallons of spray, or one-half this amount for 5 gallons of spray.

Make applications (1) Before Bloom, (2) After Bloom, (3) Memorial Day, (4) Fourth of July.

Effective on fruits and roses, including apples, cherries, peaches, pears and plums, and also on vegetables including tomatoes, potatoes, beans, cucumbers, and melons.

*This is not "fool proof" but will do for the average home orchard.

7. Q. Should I fertilize my trees or put manure in the holes at planting time?

- A. Fertilizers are of no value until the roots are established and growing, thus being able to absorb the nutrients. Manure is best used as a mulch on top of the ground well back from the main stem. It may severely injure the tree, if placed directly in the tree hole. Wet peat moss or similar material mixed with the soil at planting time (1 part of peat moss to 4 parts of soil) makes an ideal combination for loosening up the soil.

8. Q. If I use a commercial nitrogenous fertilizer such as Nitrate of Soda or Sulphate of Ammonia, how much should I use?

- A. Generally 1/4 lb. per year of age in the orchard. Example: A tree planted for four years would require 1 lb. Make the application out under the drip of the branches, preferably in early Spring just as growth starts.

9. Q. What varieties are best for me to plant?

- A. All the varieties we list are tried and tested. Therefore, your choice is dependent on the type fruit you want and the ripening season desired. Your State College or Experiment Station will also be glad to supply recommendations for your particular section and soil condition.

10. Q. How do I take care of my Boysenberry plants?

- A. Set the plants as we suggest in the planting guide sent with all orders. Let the plants trail on the ground the first year. Then they can be tied to a trellis and handled just as you would grapes.

11. Q. Can I plant apple trees next to other fruit trees, such as Pears and Peaches?

- A. The orchard can be mixed just as you want it, although many practical gardeners prefer to segregate the different kinds for convenience in spraying and general culture.

12. Q. How close must my trees be for proper cross-pollination?

- A. Individual trees not over 500-1000 feet apart will be satisfactorily cross-pollinated, if the weather at blossoming time is warm enough for bees to be active. In solid blocks of closely planted trees, however pollinizers should be provided every third or fourth row for best results.

13. Q. Are Dwarf Apple trees practical for commercial plantings?

- A. From experimental data now becoming available, we have every reason to believe that dwarf trees will be a success in commercial orchards. However, until dwarf rootstocks are available in large numbers, large plantings will not be possible.

14. Q. How can I tell if my soil is sufficiently acid for Blueberries?

- A. Soil having an acidity testing between pH of 4.4 and 5.0 is considered best. If you cannot have your soil tested locally, send a sample to your State Experiment Station (see list on next page) and they will test it for you.

APPLES! APPLES! Try them, buy them!
BALDWIN, GREENINGS: sauce them pie them
SPIES and CORTLANDS: salad, bake them
Tapioca, apple cake them.
RED DELICIOUS rich and sweet,
Grace the table; hard to beat
McINTOSH are best to munch
In the morning, after lunch,
When you go to bed at night,
Beauty, flavor always right.
APPLES! APPLES! Try them, buy them!
Treat the children, don't deny them
APPLES!

 New Hampshire—Durham

New Jer.—New Brunswick
 New York—Geneva
 North Carolina—Raleigh
 Ohio—Wooster
 Penn.—State College
 Rhode Island—Kingston
 So. Car.—Clemson
 South Dakota—Brookings
 Tennessee—Knoxville
 Vermont—Burlington
 Virginia—Blacksburg
 W. Virginia—Morgantown
 Wisconsin—Madison

16. Q. Will the roses and shrubs I plant this Spring bloom this Summer?

A. The roses will bloom profusely all Summer. Be sure to trim them at planting time as we direct in the planting guide. Many shrubs will also bloom the first year, but some which form flowers only on two-year wood may not blossom until next year.

17. Q. What can I do to prevent rabbit and mouse injury?

A. This is a hard question to answer. Fruit growers will tell you that "eternal vigilance" is the only sure control. We can make the following suggestions: Keep the area about 12 inches around each tree cultivated; put coal ashes or cinders at the base of the tree; and clean up any nearby trash or brush where rabbits and mice may harbor. Hunt the rabbits and destroy them, and poison mice according to recommendations available to you from your Experiment Station.

18. Q. What shade tree will grow the fastest, provide suitable shade and look good?

A. Our recommendation is the Chinese Elm illustrated and described on page 31. Like many of the soft wood trees, it is, however, subject to splitting from heavy loads of ice and sleet, if the trees are not kept properly trimmed.

19. Q. Are English Walnuts and Filberts hardy where I live?

A. When we have winters like those of 1933-1934 and 1942-43, the trees might be injured, if they are not in a particularly sheltered area. Generally they will succeed where you find peach trees growing.

20. Q. What size trees do you recommend?

A. We recommend the largest size and grade. After all, the first price paid for the tree is the cheapest part of the investment. However, all the trees and plants we offer are up to grade and A-1 in quality.

21. Q. Why don't you sell trees older and larger than those listed in your catalogue?

A. Older and larger trees do not transplant so well and are difficult for the planter to handle. Also the cost per tree is higher than the average buyer cares to pay.

22. Q. What are Mazzard roots?

A. Mazzard is used to differentiate this type of root stock from Mahaleb. Briefly Mazzard is the wild sweet cherry, and produces a long-lived tree which grows larger than the Mahaleb and comes into bearing a little later, and is not so hardy. Mahaleb is the perfume cherry of Europe and produces a tree smaller, earlier fruiting and hardier. Mahaleb is the most commonly used rootstock. We charge a premium for trees on Mazzard roots because they are more difficult to grow.

23. Q. Will fruit trees grow where the soil is poorly drained?

A. No fruit tree will grow well where the soil is too wet. Cherry trees in particular will not tolerate the least amount of excess water. On the other hand, plum and prune are much more tolerant and will thrive where many other fruit trees would fail. We list them as follows in order of tolerance to wet soil: Prune, Plum, Pear, Apple, Quince, Peach, Apricot, Cherry.

24. Q. Should I trim my trees when planting them?

A. It is most important that the pruning be done as we suggest in the planting guide sent with each order. Trees and plants set out in the Fall, however, should not be trimmed until early Spring.

25. Q. Which kind of fruit trees are hardiest?

A. Apple, Sour Cherry and Pear are most hardy. Peach, Apricot, and Sweet Cherry are least hardy.

26. Q. Do you guarantee your trees and plants to grow?

A. We guarantee to deliver nursery stock in A-1 condition. Because there are so many conditions over which we or the purchaser have no control, such as adverse seasons, and which may affect the success or failure of the plants, we do not sell on a guaranteed growth basis. However, when losses are reported, we help on the loss.

27. Q. How deep should I plant my fruit trees and Raspberry bushes?

A. All stock should be planted slightly deeper than it stood in the nursery row. We explain the procedure by description and illustration in the planting guide mailed with your order acknowledgment.

28. Q. My trees blossomed, but no fruit was produced. What is the trouble?

A. The blossoms could have been killed by early frost or the fruit bearing part of the blossom could have been destroyed by Winter cold. Most failures of this kind, however, are due to lack of proper pollination. (See comments on pollination in our catalogue.)

29. Q. How many Strawberries, Raspberries, Grapes, and Blueberries, and Asparagus should I plant for the average requirements for a family of five?

A. This will depend upon the family appetite for fruit. We would suggest:

Strawberries	25-50 Plants
Red Raspberries	10-50 Plants
Grapes	3-10 Plants
Blueberries	3-10 Plants
Asparagus	50-100 Plants

30. Q. I have several trees 15 years old. How can I keep them from getting too big?

A. After the trees have begun to fruit, you can hold them down by pruning the top heavily. Make a few large cuts always pruning to an outside lateral branch so as to reduce sucker growth.

31. Q. Will the Strawberry and Raspberry plants I set this Spring produce fruit this year?

A. Ordinarily, they will blossom and fruit. However, to increase the bearing surface for a big crop, the next year, it is best to remove the blossoms the first season.

HOW TO FIGURE NUMBER OF PLANTS NEEDED PER ACRE.

Multiply the distance the plants are to be set apart by the width of the row. This result divided into 43,560 the number of square feet per acre is the number of trees or plants required for an acre.

SUGGESTED SPACING FOR FRUITS

Variety	Age of Bearing	Distance Apart	Number Per Acre
Apples, Standard	2 to 7 years	35x35 ft.	35
Apples, Dwarf	2 years	15x15 ft.	193
Apricots	3 years	20x20 ft.	108
Asparagus, Field	2 years	2x5 ft.	4356
Garden	2 years	15 in.x3 ft.	10249
Blackberries	1 year	4x6 ft.	1815
Cherries, Sour	2 to 3 years	20x20 ft.	108
Cherries, Sweet	3 to 4 years	25x25 ft.	69
Currants	2 years	4x4 ft.	2722
Grapes	2 years	6x8 ft.	907
Peaches	2 to 3 years	20x20 ft.	108
Pears, Standard	3 to 4 years	20x20 ft.	108
Pears, Dwarf	2 years	15x15 ft.	193
Plums	2 to 3 years	20x20 ft.	108
Quinces	1 to 2 years	15x15 ft.	193
Raspberries	1 to 2 years	3x6 ft.	2420
Strawberries, Field	1 year	1x3 1/2 ft.	9900
Garden	1 year	1x2 ft.	21780
Blueberries	1 to 2 years	3x6 ft.	2420

Blueberries

NEW—CULTIVATED

Blueberries require an acid soil which contains an abundance of peat moss or other partly decayed vegetable matter. If your soil is deficient in this material, a heavy application of peat, rotted sawdust, or other material should be made and worked into the top 6 inches of soil.

Plant 3 or 4 feet apart in rows 6 to 8 feet apart. Will produce satisfactorily for fifty years or more. For proper pollination, plant two or more varieties. We recommend the following:

	Each	3-9 Each	10-29 Each
3-year, 12 to 15 in.	\$1.50	\$1.30	\$1.15

Bearing Size:

4-year, 15 to 24 in.	2.25	2.00	1.75
---------------------------	------	------	------

CABOT (Early). Bush is rather low and spreading, seldom reaching a height exceeding 4 ft. One of the earliest varieties, a good producer, excellent flavor, and a good shipper. Fruit is large, firm and attractive.

RANCOCAS (Midseason). Popular. Ripens about two weeks after Cabot. The bush is tall, vigorous and productive. The fruit is large, light blue, firm and attractive.

RUBEL (Late). Tall, well shaped bush, attractive appearance, excellent producer, good quality, slightly tart berry.

JERSEY (Late). Tall, well shaped bush, attractive appearance, excellent producer, large, good quality berry.

Rancocas Blueberries

Blackberries

Blackberries thrive best on fertile loam. The rows should be about 6 feet apart, with each plant approximately 2 feet apart in the row.

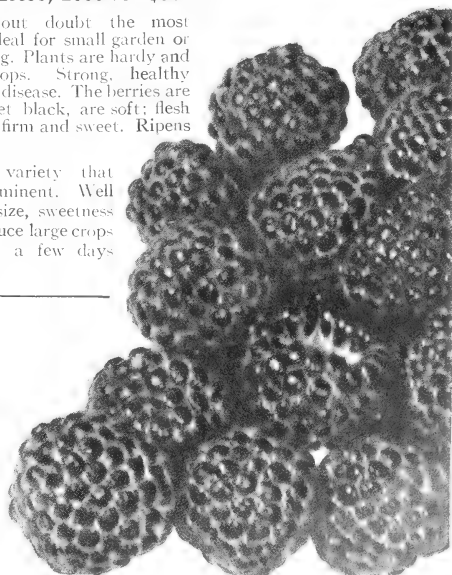

10 for \$1.50, 25 for \$2.75, 100 for \$8.25, 500 for \$27.00, 1000 for \$50.00.

ELDORADO. Without doubt the most popular variety. Ideal for small garden or commercial planting. Plants are hardy and produce heavy crops. Strong, healthy grower resistant to disease. The berries are large, elongated, jet black, are soft; flesh juicy. Moderately firm and sweet. Ripens over a long period.

ALFRED. A new variety that is becoming prominent. Well liked for its large size, sweetness and ability to produce large crops annually. Ripens a few days ahead of Eldorado.

Eldorado

Morrison

Morrison A GIANT NEW BLACK RASPBERRY

This variety, which originated in Northern Ohio is highly praised by growers everywhere. Extremely large, shiny jet black berries of fine flavor and less seedy than other sorts; excellent for market and home use. The strong, vigorous vines are very productive and free from disease and very long lived.

We recommend this variety without reservation to those who want the best Black Raspberry.

5 for 95c., 10 for \$1.80, 25 for \$3.30, 50 for \$5.50, 100 for \$9.75

BOYSENBERRY

THE NEW MONEY-MAKER

Known to bear nearly 6 tons per acre. Berries get to be 1½ to 2 inches long, 1 inch thick, Sweet, with few seeds.

The amazing new berry, a cross of the Blackberry, Raspberry and Loganberry, and is far more vigorous than any of its parents. It is immense in size and when you taste it you will agree that in flavor it stands supreme. The fruit when fully ripened will literally melt in your mouth. A distinctly different, very pleasant flavor, no core and very few seeds, make it a most delicious berry for eating fresh, for pies or for canning. If you want a real treat, here it is. It makes considerable horizontal growth as compared to its height. For easy picking, plants should be trained on a fence or wires. Plants are strong, vigorous and quite hardy. However, we advise covering with straw or hay in Winter in cold climates to avoid Winter injury.

2 for 60c., 5 for \$1.20, 10 for \$1.80, 25 for \$3.30

New

THORNLESS BOYSENBERRY

Canes smooth as velvet. Ripens 10 days to 2 weeks earlier than the common Boysenberry. The Thornless strain has retained all the good characters of its parent including its rugged, thrifty growth. It's a pleasure to pick these large berries, without a chance of scratching your hands.

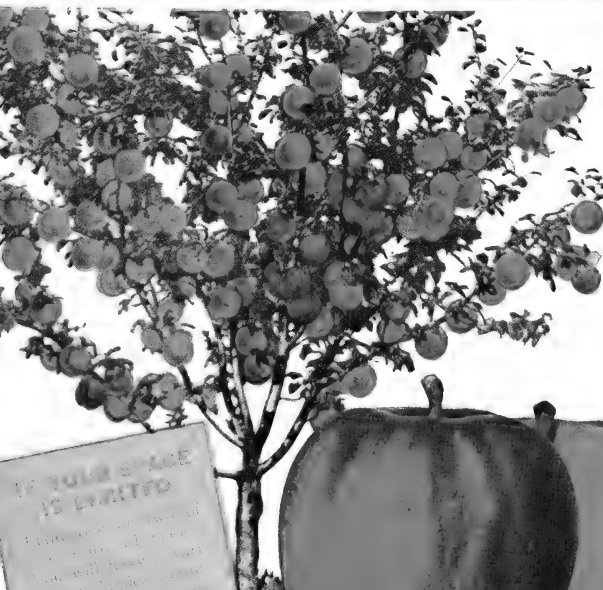

2 for \$1.20, 5 for \$2.40, 10 for \$3.60, 25 for \$6.60

Bearing Age Trees

Plant Kelly's Specimen Trees for Immediate Results

NOT Neglected OVERGROWN Trees Usually Offered for Bearing-Age Stock, But Fine, CAREFULLY GROWN, True-to-Name KELLY Trees—Your Guarantee

Don't wait for years to enjoy full-sized standard Fruit Trees. Plant Kelly's Bearing-Age Specimen Apple or Pear Trees. Ideal for the home orchard or commercial orchard where immediate results are wanted. Most of these trees have already borne fruit in the nursery row. We guarantee them to be first-class in every particular—not neglected, overgrown trees but especially grown for the purpose over a period of three to four years. Kelly's experience as fruit tree growers make these trees highly desirable. Carefully root-pruned they each have a mass of fibrous roots ready to take hold and produce in abundance.

Fine, carefully grown, true-to-name, Kelly trees—guaranteed to satisfy you! Clean, smooth and healthy—in the following varieties:

APPLES: Baldwin, Cortland, McIntosh, Northern Spy, Red Delicious, R. I. Greening, Yellow Transparent, Stayman's Winesap.

PEAR: Bartlett, Buerre Bosc, Clapp's Favorite, Kieffer, Seckel.

PLANT NUT TREES FOR FOOD AND BEAUTY

English Walnuts

BLACK WALNUT

This species is a common and stately forest tree in the middle and western states; grows from 40 to 60 feet high; has an open, spreading head and is rapid in growth; produces large crops of nuts with rough hard shell containing rich, oily kernels of fine flavor. **Trees 4-5 ft. \$1.75 each.**

BUTTERNUT

A fast growing tree that produces within two or three years after planting. Nuts are large with sweet, oily, nutritious kernels. Wonderful for nut cookies and cakes.

3-4 feet. \$1.50 each
4-5 feet. \$2.00 each

ENGLISH WALNUT

A fine, lofty growing tree, producing large crops of thin shelled, delicious nuts.

Trees, 3-4 feet. \$2.00 each

HAZEL NUT (*Filbert*)

These plants attain the height of a Peach tree if kept trimmed to one stem. For best crop production they should be grown in tree form. Two varieties needed for pollination. **3-4 ft. trees—\$1.50 each.**

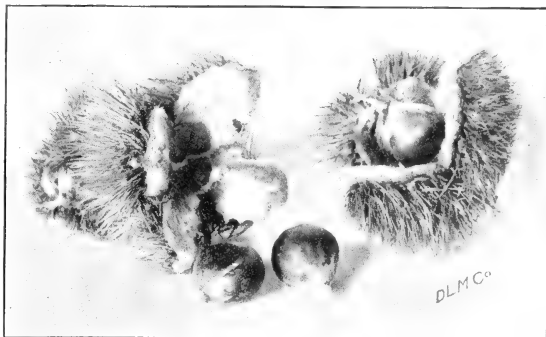

BARCELONA. Large nut of round type. One of the newer prolific yielding varieties.

DAVIANA. Medium in size; best variety to pollinate Barcelona.

Blight-Resistant

CHINESE CHESTNUT

CHINESE CHESTNUT (*Castanea mollissima*). Introduction of United States Department of Agriculture. Best of Chestnuts so introduced. The nuts are larger than those of the American Chestnut and are equally sweet and good. Does well on a wide range of soils. The trees bear very early; quality of nut very good. **3-4 ft., \$2.00 each; 4-5 ft., \$3.00 each; nicely branched trees.**

Chinese Chestnuts

Caco

Golden
Muscat

Fredonia

Grapes

Concord --THE FAVORITE

AGAWAM (Red). A large red Grape with rich aromatic flavor. A strong grower and very productive. (Oct. 1 to 5).

CACO (Red). A new wine red Grape which is proving to be a great favorite. Berries very large and sweet. (Sept. 15).

CONCORD SEEDLESS (Black). New attractive garden novelty. No seeds, plants vigorous, hardy. Fruit small and of fine flavor. Good for pies. (After Concord). \$1.00 each, 3 for \$2.75.

DELAWARE (Red). Bunches and berries small. Light red, unusually sweet and delicious. One of the best red varieties. (Oct. 1 to 5).

NIAGARA (White). The most popular white Grape. Bunches and berries extra large. Vigorous, productive and a good keeper. (Sept. 25 to 30).

The leading commercial Grape. Color blue-black. Bunches and berries large. Hardy, productive, and an excellent shipper. Succeeds over large area. Excellent for grape juice. (Sept. 25 to 30). 45c. each, 3 for \$1.10, \$2.25 per 100, \$7.50 per 50, \$14.00 per 100

NEW! Fredonia

The leading early black Grape. An introduction of the New York State Experimental Station. Plant is a strong, healthy grower; clusters medium in size; berries large and juicy. (Sept. 5 to 10.)

Golden Muscat

Wonderful new golden yellow Grape. For home use and roadside market it is one of the best. Possesses rich golden color and fine muscat aroma of European muscat. Vine is vigorous, productive; the clusters are very large and compact. Berries are large, juicy, sweet, and tender. (Sept. 27 to Oct. 5). \$1.00 each, 3 for \$2.75

Bronx Seedless--Red

A GRAND NEW GRAPE

Excellent in quality. Vine vigorous, hardy, productive. \$1.95 each

PORTLAND (White). Holds first place among Grapes as an early white variety. Vine is hardy, productive and healthy. Bunches and berries larger than any other white Grape. (Sept. 1 to 8).

SENECA (White). New pure vinifera. Best dessert variety. Flavor sweet, vinous and aromatic. Plant vigorous, productive, hardy. (Sept. 1 to 8). \$1.00 each, 3 for \$2.75.

SHERIDAN (Black). An improved Concord, with firmer, sweeter berries. Large and more compact. About a week later.

WORDEN (Black). A large early black Grape of fine quality. Berries and bunches large. (Sept. 20 to 25).

VAN BUREN (Black). Best new very early Grape. Desirable for home and commercial planting. Resembles Concord in size but much sweeter. (Aug. 28 to Sept. 2). \$1.00 each, 3 for \$2.75.

This new red Grape is the best seedless variety available today. Clusters are large, very long, attractive. Some of bearing vines produced clusters this year 12 inches long. Berries large, entirely seedless, firm, crisp. May be eaten with skin as California Grapes. Ripens September 20th.

... Very limited supply

Every Home Should Grow these Delicacies

McDonald

Tender, Fresh Asparagus

You'll be surprised how easy it is to grow Asparagus sufficient for a family of four or five. It is very healthful, rich in minerals and vitamins. Every garden should have some. Protect your families' health, and enjoy this tender, delicious vegetable. Room required is very small. Complete planting and cultural directions sent free with each order.

MARY WASHINGTON—The Outstanding Variety

This is, without doubt, the best variety grown at this time. It is a very strong grower, stalk of giant size, green color, rich and tender. In addition to being very productive, it is rust resistant and a bed will last for years.

EXTRA STRONG, 2-YEAR PLANTS

\$1.75 per 25, 50 for \$3.25, \$4.50 per 100, \$16.00 per 500, \$30.00 per 1000

Rhubarb • HEALTHFUL DELICIOUS

MYATT'S LINNAEUS. The best known and most widely planted variety. Large, early, tender—not the least tough or stringy—with mild, subacid flavor. Excellent for pies or sauce, and very desirable for canning. Plant 3 or 4 feet apart in rich garden soil. **Extra Strong, 2-Year Roots:** 3 for 75c., 10 for \$2.00

Mary Washington

McDONALD ALL-RED. Introduced by the McDonald College, Quebec, Canada. This remarkable variety is of highest quality and when cooked without peeling has a high crimson color. Flavor pleasantly acid but sweet. An unsurpassed commercial variety commanding premium prices. **75c. each, 3 for \$2.00**

APRICOTS • Easy to Grow

So Delicious for Jams and Sauces

MOORPARK. Very large, deep yellow, with red cheek. Has the highest quality and finest flavor of all Apricots. *August.*

EARLY GOLDEN. Medium, roundish oval. Skin smooth, pale orange. Flesh yellow, moderately juicy and sweet, with very good flavor. Freestone.

Important—Apricots require cross-pollination, therefore it is necessary to set two different varieties to insure a set of fruit.

Apricot, Early Golden

Wayne County Orange

QUINCE TREES

Need Little Room to Grow—and Their Tangy Fruits Will Fill Your Pantry Shelves

Its pre-eminence as a fruit for jellies and preserves makes the Quince a profitable tree for the fruit grower, the farmer, or any one having even a small garden. The Quince tree does not take much room on account of its dwarfish character. Any kind of good, rich soil will give good results. It can be grown in bush or tree form. Hardly any family's fruit supply for the Winter is complete without the Quince. We recommend the following varieties:

ORANGE. Popular, extensively cultivated, reliable, and satisfactory. Roundish, bright golden yellow, very large, fine grained, fine quality. Best for cooking.

WAYNE COUNTY ORANGE. A superior new variety introduced largely through our efforts. Extra large, golden yellow, of excellent quality. Regular cropper. *Ripens early September.*

	1-9—Each	10-49—Each
2-Year, Large—4 to 5 ft.	\$1.75	\$1.50
2-Year—3 to 4 ft.	1.60	1.35

Seeds for your Victory Garden

DLMG

BEANS

Pkt. 10c., $\frac{1}{4}$ lb. 18c., $\frac{1}{2}$ lb. 30c., lb. 50c.

Bountiful. Early, popular green podded Bean. Straw colored seed. Flat, absolutely stringless pods. The finest quality. 48 days.

Burpee's Stringless. Early, with dark green pods, 5 in. long. Sturdy, nearly round, stringless, fiberless. Seed coffee brown. 50 days.

Golden Wax. Rustproof; early, productive. Pods are 4-4 $\frac{1}{2}$ in. long, very stout, straight or slightly curved and oval in form; flesh brittle, stringless, of good quality; bright yellow. Seed white, much mottled brown. 52 days.

Black Wax Pencil Pod. Best dwarf black seeded variety. Early, very productive. Pods large, 6 $\frac{1}{2}$ to 7 in. long, round, nearly straight, strictly stringless, fiberless, fleshy, brittle. Clean yellow. 56 days.

Kentucky Wonder or Old Homestead. Most popular, green-podded, climbing or cornhill Bean; early and productive. Pods 8 to 9 in. long, nearly round, very slender, decidedly curved, slightly stringy. Tender. 65 days.

LIMA BEANS

Pkt. 10c., $\frac{1}{4}$ lb. 20c., $\frac{1}{2}$ lb. 35c., lb. 55c.

Fordhook Bush. A most excellent early and distinct variety and exceedingly popular with market gardeners. Pods about 5 in. long, containing 4 to 5 large, oval-shaped, very thick white beans of the so-called Potato Lima type. 75 days.

BROCCOLI

Pkt. 10c.

Calabrese. The best strain of the Italian green-sprouting Broccoli, which produce large, compact heads of bluish-green flower buds. Side shoots continue to grow after main head has been removed. 70 days.

BEETS

Pkt. 10c., oz. 40c., $\frac{1}{4}$ lb. \$1.30, $\frac{1}{2}$ lb. \$2.10

Detroit Dark Red. Fine globe-shaped Beet of excellent quality. Very popular for canning. Deep ox-blood red. Sweet and tender. Small tap root. 68 days.

Early Wonder. Roots semi-globular with smooth, dark purplish red skin. Very small tap root. Medium size. Green tops. 58 days.

Crosby's Egyptian. First for early market. Roots a flattened globe shape; skin fairly dark red, flesh a trifle lighter in color and lightly zoned; tops large and tall. 60 days.

SWISS CHARD

Pkt. 10c., oz. 30c., $\frac{1}{4}$ lb. 90c., $\frac{1}{2}$ lb. \$1.50

Lucullus. Pale green leaves crumpled and curled like Savoy Cabbage. The stiff-ribbed Chards are white and broad. 50 days.

CABBAGE

Pkt. 10c.

Copenhagen Market. Dependably early and uniform. Stem short, heads large, round and solid, with a few outer leaves of upright growth. 70 days.

Danish Ballhead (Short Stem). Heavy yielding strain, producing large heads, solid and of good color. Excellent for storage and kraut. 110 days.

CARROTS

Pkt. 10c., $\frac{1}{2}$ oz. 35c., oz. 60c.

Danver Half Long. The best known second early half long sort; roots 6 to 8 in. long, tapering to a blunt point. Flesh deep orange, tender and good quality. 75 days.

Chantenay Red Cored (Coreless). Roots 5 to 6 in. long, 2 to 2 $\frac{1}{2}$ in. thick at the crown. Deep orange-red. A fine medium early, half long, stump-rooted Carrot. Core reddish orange. 70 days.

CUCUMBER

Pkt. 10c., oz. 40c., $\frac{1}{4}$ lb. \$1.30, $\frac{1}{2}$ lb. \$2.10

A and C, White Spine. Uniform, nearly cylindrical, very dark green, well rounded at ends. Highly desirable for shipping and market. 9 in. 68 days.

Chicago Pickling or Westfield. Medium green, square ended. Early and largest of pickling type. 59 days.

Long Green Improved. A black spine type. 12 to 13 in. long. Flesh white and crisp. Dependable all purpose variety for home garden use. 68 days.

SWEET CORN

Pkt. 10c., $\frac{1}{4}$ lb. 18c., $\frac{1}{2}$ lb. 30c., lb. 50c.

Golden Sunshine. A very early Corn of the Golden Bantam type, maturing several days earlier than that variety. More dwarf. 75 days.

Improved Golden Bantam. An excellent mid-season yellow Corn with 8-in. ears and 10 to 14 rows. Very sweet and remains tender longer than regular Golden Bantam. 82 days.

ENDIVE

Pkt. 10c.

Green Curled. Late variety. Tufty and full in center. Midrib white, thick, tender and fleshy. 90 days.

LETTUCE

Pkt. 10c., $\frac{1}{2}$ oz. 20c., oz. 35c., $\frac{1}{4}$ lb. \$1.00

Big Boston. Excellent stock of the old favorite butter-head Lettuce.

Grand Rapids. One of the most popular loose-leaved sorts. Leaves are light green and frilled. Plant erect and compact. Excellent for early planting and forcing. 43 days.

Iceberg. A curled heading variety with light green leaves, tinged with brown. Crisp, sweet, white interior. Heads large and compact. 80 days.

New York or Wonderful. A widely used Lettuce. Solid, compact heads, very heavy. Outer leaves are deep green, heart blanches to a beautiful white. Tasty, crisp, delicious. Plants are deep rooting. Not recommended for forcing.

Simpson, Early Curled Silesia. White seed. Fine home garden sort, with light green frilled leaves. Early, hardy and compact. Tender and sweet. 45 days.

MUSKMELON

Pkt. 10c., oz. 30c.

Bender's Surprise. Salmon fleshed Melon. Very popular in New York State. Fruit medium to large, oval shaped, distinctly ribbed. 90 days.

Honey Rock. This Melon is a favorite because of its deeply colored salmon flesh and its sweetness and flavor. Nearly round, Melons weigh 3 lbs., have light yellow skin, and a heavy, coarse, gray netting. For home and market use.

ONION

Pkt. 10c., $\frac{1}{2}$ oz. 50c.

Yellow Globe Danvers. Standard main crop variety, fine for storage. Bulbs large, round, yellow, firm, white fleshed. 115 days.

Prizetaker. Large, yellow Onion of very handsome globe shape. Flavor mild. Very productive. 105 days.

Sweet Spanish. Very large, bright golden yellow, globe-shaped Onions. Extremely uniform, medium-topped bulbs. Very mild. 108 days.

PEAS

Pkt. 10c., $\frac{1}{4}$ lb. 18c., $\frac{1}{2}$ lb. 30c., lb. 50c.

Alaska. Earliest Pea known. Small round, smooth Peas. Pods grown about 2 $\frac{1}{2}$ in. long. Straight and blunt at the end, light green. 55 days.

Gradus. A large podded, wrinkled variety for home garden and market use. Vines grow 3 to 3 $\frac{1}{2}$ ft. Pods about 4 in. long and contain many Peas of good quality. 60 days.

Improved Telephone. (Dark Podded Strain). Standard main crop Pea. Pods 4 $\frac{1}{2}$ to 5 $\frac{1}{2}$ in., are dark green, and contain many well wrinkled Peas. 73 days.

Little Marvel. A productive dwarf sort, the vines growing 15 to 20 in. high. Dark green, plump, well filled pods. 62 days.

Thomas Laxton. For many years a favorite early sort. Pods are dark colored, 3 $\frac{1}{2}$ in. long and contain many wrinkled and very sweet Peas. 62 days.

PARSNIP

Pkt. 10c., oz. 25c.

Improved Hollow Crown or Guernsey. A wonderful cropper. Long, white roots, tender, sugary. Roots 12 to 15 in. long, 3 in. thick at shoulder. Tapered and smooth. 95 days.

PEPPER

Pkt. 10c.

California Wonder. Smooth, uniform, deep green, 4-lobed fruit. Flesh thick, sweet and mild. 69 days.

RADISH

Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 90c., $\frac{1}{2}$ lb. \$1.00

Crimson Giant. Large, early maturing, Turnip-shaped Radish almost double the size of any of the other Turnip-shaped varieties. Grows quickly, has attractive crimson skin; flesh is pure white, fine flavor, firm, crisp. Never hollow or pithy.

French Breakfast. Oblong roots, scarlet color with a white tip. Half an inch thick by 1 $\frac{1}{2}$ in. long. 25 days.

Early Scarlet White Tip. Round and smooth. Color dull scarlet-red with one-third white area at bottom. Flesh white, crisp, and tender. 26 days.

White Icicle. Pure white, delicious, crisp flesh, always tender, juicy, and delicately snappy. Roots grow about 5 in. long, the shape of an icicle. Straight and free from side roots. 27 days.

PARSLEY

Pkt. 10c.

Champion Moss Curled. Leaves uniform dark green color, finely cut and closely curled. 70 days.

SPINACH

Pkt. 10c.

Bloomsdale Long Standing Savoy. The standard long standing, dark green, crumpled leaf variety. Plant large, erect and sturdy. 42 days.

New Zealand. Large, spreading plants with small, pointed leaves. Thrives in hot weather. Seeds large and hard-horned. 70 days.

PUMPKIN

Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 45c., $\frac{1}{2}$ lb. 75c.

Small Sugar or New England Pie. Small orange-skinned, slightly ribbed. Finest quality flesh and most popular for pies. 108 days.

PACKET 10c EACH
any 6 for 50c—any 14 for \$1.00

- 1 pkt. Tomatoes, Bonny Best
- 1 pkt. Spinach, Bloomsdale

Postpaid **98c.** Value \$1.38

Three Great Values

SQUASH

Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 60c., $\frac{1}{2}$ lb. \$1.00
Chicago Warted Hubbard (Green). Largest and best rough-skinned Hubbards. Large, heavily warted fruits of fine form, rich dark green color. Flesh golden yellow, dry and sweet. 105 days.

Delicious (Green). Medium size, top-shaped Winter sort, with dark green skin. Flesh very thick and bright yellow. 102 days.

Giant Summer Crookneck. Larger, later, more warted strain of Crookneck. Light yellow, flesh thick and yellow. 58 days.

Table Queen. Very early; extremely prolific. Dark green fruits pointed acorn shape. Flesh light yellow, bakes well with good flavor. 58 days.

TOMATO

Pkt. 10c., $\frac{1}{2}$ oz. 35c.

Bonny Best. Splendid large, second early Tomato. Slightly flattened globe shape. Smooth, solid, bright scarlet. 73 days.

Earliana. Excellent early, bright scarlet Tomato. Flat, smooth. 66 days.

Pritchard. Fusarium wilt-resistant. Fruit thick, globular. Color light scarlet. 76 days.

Marglobe. Produces medium size, smooth, deep, globe-shaped, meaty, bright red fruits in clusters of 5 to 7. Heavy producer. Resistant to Fusarium. 77 days.

TURNIP

Pkt. 10c., oz. 25c., $\frac{1}{4}$ lb. 75c.

Purple Top Strap Leaf. Early sort with purple shouldered white flat roots. Flesh white, fine grained, and tender. 46 days.

Purple Top White Globe. A large, globe-shaped variety. Very smooth, upper part purple red, white below. 57 days.

RUTA BAGA

Pkt. 10c., oz. 25c., $\frac{1}{4}$ lb. 75c.

American Purple Top. Dependable variety. Roots large, globular, neck small. Flesh light yellow, firm, and of good texture. 90 days.

AGERATUM. Dwarf, bushy border and edging plants. Flowers all season.

ALYSSEUM, Little Gem. Low growing. White flowers, sweet scented. Excellent for borders.

ASTERS, El Monte. Largest Aster known. Fully double, wilt-resistant. Crimson.

Giant Comet. Mixed colors.

Giant Branching. Mixed colors.

Queen of the Market. Mixed.

Daybreak. Popular variety. Mixed colors.

Peony Flowered. Mixed colors.

BACHELOR BUTTON. Double flowers on long, graceful stems.

BABY'S BREATH. Attractive, small plants covered with tiny white blossoms.

CALENDULA. Free flowering Annual. Blooms until late Fall.

Campfire. Dark orange, scarlet sheen.

Best Mixed. Assortment of colors.

CANDYTUFF. Easily grown. May be sown early. 1 ft. high.

COLUMBINE (AQUILEGIA). Perennial.

COSMOS, Pinkie. New. Clear rose-pink, large.

Orange Flame. Distinctive brilliant orange-colored blooms. Plants bushy. Good for cutting. A "Gold Medal" winner.

Early Flowering Mixed. Large flowers. Blooms early.

DELPHINIUM. Perennial. Choice colors.

DIANTHUS chinensis (Old-fashioned Pinks). Easy to grow. For cutting or borders.

ENGLISH DAISY (Bellis). Double flowers, for edging or low beds.

FOXGLOVE (Digitalis). Blossoms grow on long spikes.

MARIGOLD, Double African. Early. Large flowers.

Gigantea, Sunset Giants. Largest Marigold. Flowers loosely formed. Sweet fragrance.

Harmony Hybrid Mixed. Compact plants. 12 to 14 in. high. Wide range of lovely colors.

Flowers have crested centers.

Crown of Gold. Golden orange flowers. Crested centers. Stays in bloom several weeks.

MORNING GLORY, Heavenly Blue. White throat. Early.

Giant Oriental. Many colors.

NASTURTIUMS, Tall Mixed. Climbing. Mixture of colors.

Dwarf Mixed. Low growing, compact plants.

Golden Glean. Bush type, sweet-scented.

PETUNIA, Howard Star. Profusion of unique blooms with five-pointed star in center.

Rose King. Bears freely large, uniform rosy flowers.

Blue Bee. Beautiful violet blue.

Rosy Morn. Low growing, covered with a mass of blooms over a long season. Carmine-pink with white throat.

Striped and Blotched. Many colors combined to make a variety of markings.

PORTULACA. Low growing annual. Small flowers. Light green, moss-like foliage.

POPPIES. Fine annual flowers.

Shirley Mixed. Semi-double, many shades.

Double Flowered. Large flowers, plants tall.

California. Brilliant flowers, excellent for cutting.

PHLOX. Blooms profusely all Summer. Annual mixed.

SNAPDRAGON. Large flowers on long stems. Many colors.

SWEET PEAS, Spencer Mixed. Favorite for size and beauty. Long stems. Strong vines.

Grandiflora. Old-fashioned sweet-scented Sweet Pea. Very good mixture of colors.

SWEET WILLIAM. Perennial. Blooms early in Spring.

VERBENA. Consistent bloomer. Rare colors.

ZINNIA, Dahlia-flowered Mixed. Makes a brilliant display from July to frost. Flowers last many days when cut. Sturdy, well branched plants.

Fantasy Wildfire. Shaggy flowers of bright scarlet. Strong growing, free flowering. 2 $\frac{1}{2}$ to 3 ft.

Crown of Gold. Pastel tints. Many pastel shades. Soft yellow and pink, old gold, apricot pink, peach, salmon, buff.

California Giants. Flowers are large, flat and graceful with long stems. Plants grow 3 to 4 ft.

"SPECIAL MERIT" Flower Garden Collection

- Calendula, Campfire
- Cosmos, Pinkie
- Poppy, Shirley Mixed
- Zinnia, Dahlia-flowered Mixed
- Marigold, Sunset Giant
- Aster, Giant Comet
- Petunia, Howard Star

Kelly's LAWN GRASS SEED

KELLY'S "SPECIAL MIXTURE" LAWN SEED

This is our finest mixture of grass seed for lawns and it is blended from the very best quality seeds to give you a beautiful green lawn that will last. **Lb. 70c., 5 lbs. \$3.35, 10 lbs. \$6.50, 50 lbs. \$31.50, 100 lbs. \$60.00.**

KELLY'S "GREEN CARPET" LAWN SEED

A quality mixture of lawn grass seed suitable for the average lawn. Only the most desirable varieties used in this mixture. **Lb. 55c., 5 lbs. \$2.60, 10 lbs. \$5.00, 50 lbs. \$24.00, 100 lbs. \$45.00.**

KELLY'S "SHADY SPOT" LAWN GRASS SEED

This mixture contains those varieties of grass seeds that grow and do the best in shady places. If you have trees in or around your lawn, use one of the above mixtures for the main part of your lawn and this Shady Spot mixture under the trees and shady sides of buildings. **Lb. 70c., 5 lbs. \$3.35, 10 lbs. \$6.50, 50 lbs. \$31.50.**

Roses for Every Garden

Choice Everblooming

Selected, Strong, Field-Grown, 2-Year Blooming Size Bushes
75c. each, 10 for \$6.00

AMI QUINARD. Tall, branching plants with medium-sized, semi-double flowers of deep velvety crimson. Lasting fragrance.

AUTUMN. Bicolor. Compact, very double flowers of burnt orange streaked with red; moderately fragrant; close-growing, upright plants with heavy foliage. Known for superb Fall bloom.

CALEDONIA. Large, very double, high-centered flower of pure white, borne singly on long, strong stem. Average plant with leathery, dark green foliage.

COLUMBIA. Beautiful rose-pink. Strong, vigorous habit, exceptionally free blooming. Delightfully fragrant.

CONDESA DE SASTAGO. A splendid, double Rose with the vivid colors of the sparkling species. Austrian copper. The buds are golden yellow, beautifully striped with capucine red.

E. G. HILL. Great massive blooms of deep maroon, velvety on inside, very fragrant. Vigorous, healthy grower, constantly blooming.

ETOILE DE HOLLANDE. Large, velvety crimson flowers, unusually fragrant. Branching plants with very large, healthy foliage. We consider it the finest red Rose in the world. The very large, fragrant flowers are superb when in the half-open state. Has the largest leaves among the Hybrid Tea Roses, and is unusually healthy.

GOLDEN DAWN. Yellow. Glorious, double flowers of lemon-yellow, nicely formed and deliciously fragrant. Spreading plants, the healthiest we have in the garden. Attractive foliage.

GOLDEN RAPTURE. Unfading canary-yellow, cup-shaped flower of excellent form with a mass of gold anthers, glorifying the center of the flower. Plants vigorous and free blooming, with dark, glossy, holly-like foliage.

LADY FORTEVIOT. Bicolor. Double cinnamon-peach flowers, very fragrant. One of the newer favorite Roses. Autumn bloom is really fine.

LEONARD BARRON. Mammoth blooms, often 6 in. across. Very full, salmon with glow of amber.

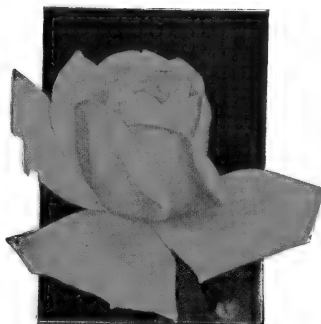

MARGARET McGREDY. Large, beautifully shaped, full, double flowers, a brilliant shade of red, passing as the flowers age to carmine rose. Borne on long, stiff stems, and hold their form and beauty for a long time.

McGREDY'S IVORY. Lovely, large, double flowers, moderately fragrant. Soft delicate, creamy white merging into yellow at the base. Vigorous, disease resistant, and prolific.

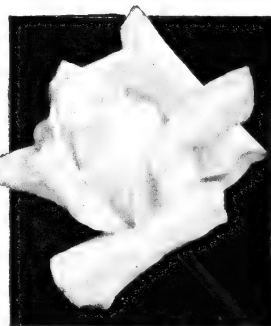

PINK DAWN. Handsome, deep rose pink flower, opening to lively pink with an orange base. Sweetly fragrant. One of the best of the modern pink Roses.

75c. each, 10 for \$6.00

PINK RADIANCE. The pink Rose that never fails. Large, globular flowers of two-toned pink, light silvery rose inside and deeper outside. Plants unusually robust in growth.

ROUGE MALLERIN. Fragrant, large red Rose. Plants are strong and productive.

SOEUR THERESE. Exquisite buds and semi-double, cupped flowers of golden yellow, with edges of petals spotted madder-carmine. Sweetbrier fragrance.

TALISMAN. Bicolor. Variable flowers ranging from rich scarlet and gold to deep rose, and pale yellow; fragrant. One of the earlier multi-colored Roses.

HARDY Climbing Roses

CLIMBING AMERICAN BEAUTY. Crimson. Large, fragrant blooms of fine form, borne in clusters. Blooms early in the season.

PAUL'S SCARLET. Intensely red flowers, borne in loose clusters. Often blooms in Autumn. Highly recommended.

MARY WALLACE. Very large, silver pink flowers borne in profusion.

SILVER MOON. Long, creamy buds of nankeen yellow. Turn to gigantic saucer-shaped, moon-white flowers.

PRIMROSE. Yellow, large, full flowers on long stems. A very fine and hardy climber that blooms in midseason.

Ampelopsis

CLIMBING VINES

ALL KELLY VINES ARE READY TO FLOWER FIRST SEASON AFTER PLANTING

AMPELOPSIS Veitchi (Boston Ivy). Especially recommended for covering smooth concrete, brick or stone walls. Its blue berries are most attractive against the Fall colors of crimson and yellow. Will grow up to 40 ft. high and cover a large area of building surface. **40c. each, 3 for \$1.15.**

EVERGREEN BITTERSWEET (Winter-creeper). Will climb either brick or wood, but will not cling to stucco. The dark green, leathery leaves remain during the entire Winter and form a perfect background for its large red bittersweet berries. Besides its beauty as a climber, it can be kept trimmed into a most attractive evergreen shrub. No better ground cover for steep banks can be found. **75c. each**

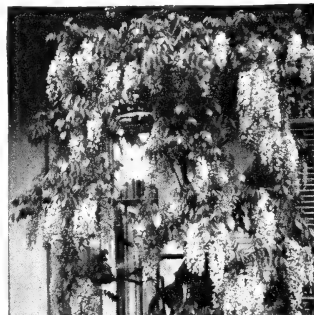

HALL'S HONEYSUCKLE VINE. Trumpet shaped flowers of white and gold are very fragrant and remain during the entire Summer until killed by the early Winter freezes. The foliage remains green during the Winter where it has protection of snow or mulch. An excellent ground cover for steep banks. Will also climb on trellis or tree trunk. **40c. each, 3 for \$1.00.**

PURPLE WISTERIA. One of the most popular and best beloved of all the vines. Will climb conductor pipes, wires or limbs with "strong grip and its heavy clusters of purple blooms look like giant clusters of purple grapes hanging from it. The wood is so strong and vigorous that this vine can be trained in to a small tree and while as a vine it blooms in May and June, it will bloom 2 or 3 times during the Summer when trained into tree form. **\$1.00. each.**

TRUMPETCREEPER (Bignonia radicans). An old favorite that will stand the most severe climatic conditions. Will cling to any rough surface. The 6-in. long flowers at the ends of the branches are in clusters and are long, trumpet shaped and brilliant orange red. **50c. each.**

Silver Lace Vine

Wisteria

SILVER LACE VINE (Fleeceflower). The delicate fleecelike flower resembles the finest white lace. The light green foliage makes a perfect companion for such dainty flowers. Blooms heavily from Midsummer until Fall. Grows about 20 ft. the first season. **75c. each, 3 for \$2.00.**

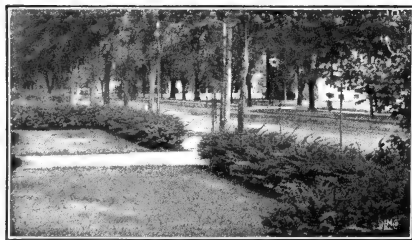

BITTERSWEET (Celastrus orbiculatus). This is the old-fashioned Winter bouquet variety that is native to most of the United States and is so common on the public markets around Thanksgiving time. Its large clusters of orange and crimson berries are in great demand. **50c. each.**

CLEMATIS Jackmani. This rapid grower is very generous with its very large single purple blooms from July to September. **85c. each, 3 for \$2.25.**

CLEMATIS Mme Ed. Andre. A new variety which is a velvety brick red. Its crimson blooms put on a most attractive display from July to September. **\$1.00 each, 3 for \$2.65.**

CLEMATIS Paniculata (Sweet Scented Clematis). Comes at a time in the early Fall when there are not many flowers available and is most welcome with its tiny, star-shaped white flowers which are extremely fragrant. **45c. each, 3 for \$1.20.**

DUTCHMAN'S PIPE (Birthwort). A most rapid grower with large, heart-shaped leaves. Long, pipe-shaped purplish flowers are very unusual and attractive. Makes a most dense screen for porches or pergolas. **75c. each, 3 for \$2.00.**

Barberry Thunbergi

AMOR RIVER PRIVET. Will grow to 10 ft. in height, but may be pruned to any height and sheared to desired form. Branches are upright; foliage oval or oblong. Can be made very dense by pruning. Resembles California Privet in growth. Very hardy and almost an evergreen, holding its green leaves almost all Winter. Strong bushes, 18-24 in., **\$2.00 per 10, \$15.00 per 100.**

RED LEAF BARBERRY. Very popular for specimen grouping and for edging taller plantings of shrubs or evergreens. Glossy purplish red leaves. Makes a brilliant colorful hedge. Special hedge size, 12-18 in. **35c. each, \$3.00 per 10, \$25.00 per 100.**

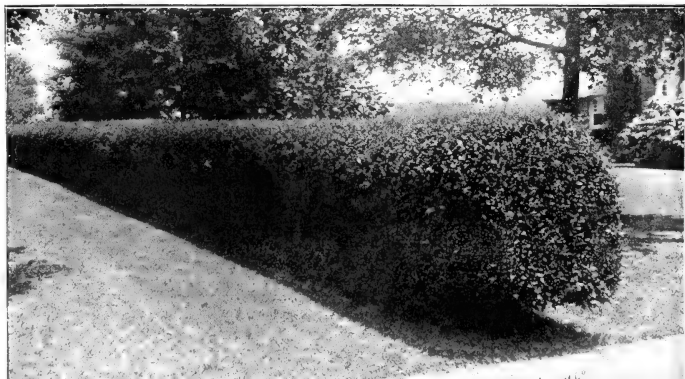

CALIFORNIA PRIVET. The most popular Privet for hedges. It is upright and stiff in habit. Foliage oval and dark green. It is almost an evergreen. Not as hardy as the others in the extreme northern sections. Is most attractive when trimmed to a height of 2 to 5 ft., about the height of a fence. 18-24 in., **\$1.80 per 10, \$10.00 per 100; 2-3 ft., \$2.50 per 10, \$15.00 per 100.**

California Privet →

KELLY'S HEDGES

Protect and Beautify

BARBERRY Thunbergi. The best all-purpose hedge. A shrub of marked excellence because of its bright green foliage which changes to brilliant colors in the Fall and its bright scarlet berries which are very conspicuous throughout the Winter. Their habit is dwarf and regular spreading. Grows well in the shade and extensively used in landscape work. It is very hardy and has never been known to Winterkill. It bears and shears well and makes a dense hedge. 15-18 in. **30c. each, \$2.50 per 10, \$20.00 per 100; 18-24 in., 45c. each, \$3.50 per 10, \$25.00 per 100.**

KELLY'S SHRUBS

(Numbers in parentheses indicate height at maturity but shrubs may be kept trimmed to desired height)

ALMOND. Graceful and dainty mistress of the lawn. Double pink rosettes in May. (4-5 ft.)

ALTHEAS. Shamrock green leaves form backdrop for double Rose-like flowers. A most welcome sight in late Fall. 4 colors—Pink, Red, Purple and White. (6-8 ft.)

BEAUTY BUSH. Cascades of pale pink during June. This new introduction resembles Weigela in blooms. Gracefully arching limbs give shrub added virtue. (4-5 ft.) **18-24 in. 75c. each, 3 for \$2.00.**

DEUTZIA Gracilis. A charming little "must" for every garden. Slender twigs covered with white flowers in May and June. (18 in.)

DEUTZIA, Pride of Rochester. Vigorous, upright, tough and productive. Heavy covering of small white, Carnation-like flowers changing to red in the center. (5-6 ft.)

EUONYMUS Europaeus (Bush Bittersweet). Large, erect shrub; yellow flowers in nodding clusters in May followed by rose colored berries that stay until Winter. Excellent for Winter bouquet. (12-14 ft.)

FORSYTHIA. As much a harbinger of Spring as the robin. The pure gold flowers in early Spring are produced before the leaves appear. We offer this plant in 3 varieties:

Fortunei. Which is a tall and stately upright grower. (6 ft.)

Intermedia. Which is the same except more dwarfed. (4 ft.)

Suspensa or Weeping Forsythia. Is ideal for steep banks or as a specimen. Grows to about 5 ft. and then gracefully falls until it hits the ground like a golden waterfall. (5 ft.)

HYDRANGEA Arborescens (Snowball Hydrangea). This easy going shrub thrives everywhere and never fails to put on a display of showy pure white, snowball-like flowers. (3 ft.)

INDIAN CURRANT. Delicate little pink flowers against a reddish green foliage followed by coral colored berries that remain most of the Winter. Keep Winter birds near with abundance of these berries. (3-4 ft.)

KERRIA Japonica. Very slender, light green limbs covered with buttercup-like blooms of bright orange in July. (3-4 ft.) **18-24 in. 75c. each, 3 for \$2.00.**

LILAC, Common American. The living landmarks. Hardy and vigorous in any soil or climate. Large clusters on Decoration Day. Offered in both white and purple. (6-8 ft.)

PHILADELPHUS Coronarius. Tall and exceptionally vigorous. Large white sprays of blooms in May are most attractive. This is one of our most popular shrubs. (6-8 ft.)

PHILADELPHUS Virginalis. The reliable old, sweet-scented Mock-orange known and loved by all. Will tolerate smoke and other hard city conditions. (5-6 ft.) **18-24 in. 75c. each, 3 for \$2.00.**

PURPLE FRINGE. Blossoms like a purple puff of smoke that linger most of the summer. (6-8 ft.) **2-3 ft., 75c. each, 3 for \$2.00.**

RHODOTYPOS Kerrioides (Jet-head). Yellowish green foliage gives good foliage contrast. White buttercup-shaped blooms in May followed by black berries. Will grow in partial or full shade. (4-5 ft.)

SNOWBALL (Viburnum opulus sterile). The thoughts of home and friends are stimulated by the sight of the large, creamy white blossoms of the Snowball on Decoration Day. Will grow anywhere. (6-8 ft.)

SNOWBERRY. Small pink flowers in June or July. Waxy white berries from August till Spring. Attractive dense foliage and berries attract birds. Grows under most adverse conditions. (4 ft.)

SPIRAEA, Anthony Waterer. With its low, rosy crimson flowers and narrow leaves is one of the most popular of the Spiraeas. Very low growing and hardy. Blossoms all Summer. (18-24 in.)

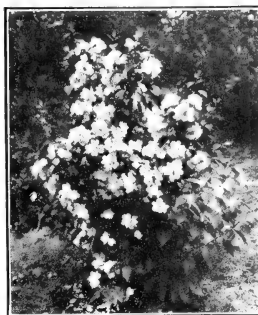

SPIRAEA Thunbergi. In late April its white flowers cover the very soft, tiny leaves and give the effect of a white waterfall. Extremely hardy. (3-4 ft.)

SPIRAEA Van Houttei. Probably the best known of all the shrubs. Will tolerate shade and adverse city conditions. Grows in any soil. Completely covered with white flowers in June. (4-6 ft.) **2-3 ft., 35c. each, 3 for 95c., 10 for \$3.00.**

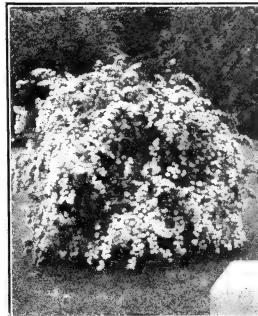

WEIGELA, Bristol Ruby (Plant Patent No. 492). As compared with Eva Rathke, Bristol Ruby is harder and more vigorous, and makes a thrifty, shapely plant. Color in effect is a soft ruby-red, shading to garnet-crimson, without a harsh tone. Blossoms somewhat larger than Eva Rathke, are distributed evenly throughout the plant with remarkable profusion through June and well into July, and continuing throughout the season. (4-5 ft.) **2-3 ft., \$1.25 each.**

WEIGELA, Eva Rathke. Is famous for its scarlet, trumpet-shaped blooms and for its hardness. Blossoms heavily in June and moderately during rest of the season. (3-5 ft.)

WEIGELA Rosea. Tall and vigorous with deep pink blooms all Summer. (5-6 ft.)

Philadelphus (Mockorange)

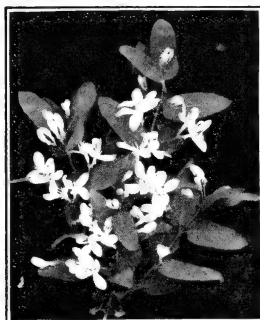

Spiraea Van Houttei

Snowball
(Viburnum opulus sterile)

WHITE FRINGE (Old Man's Beard). A lovely old variety that has stood the test of time. Graceful, drooping limbs bear clouds of lacy, white blooms which are followed by long clusters of black berries. May be left untrimmed and grown as a large shrub or trimmed into a small tree. (8-10 ft.) **2-3 ft., 75c. each, 3 for \$2.00.**

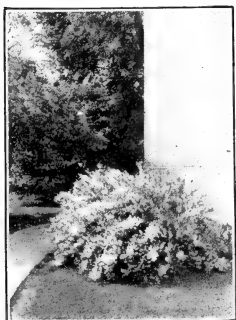

Tartarian Honeysuckle

Forsythia

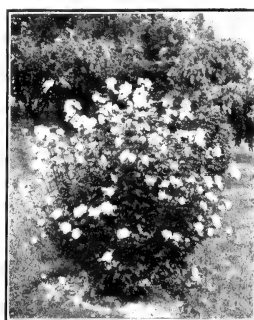

TARTARIAN HONEYSUCKLE. Dainty, small, pink, trumpet-shaped blooms in May, followed by a profusion of red berries. Leaves have a bluish gray cast to them. Makes a large shrub excellent for screening and specimen planting. Grows in the poorest soil. (6-8 ft.)

Slender Deutzia (D. Gracilis)

Beauty Bush

Althea (Rose of Sharon)

Weigela (Bristol Ruby)

Flowering Shrubs

Hybrid French Lilacs

Large, 2-3 ft. Size—\$1.15 each, 3 for \$3.00

Our French Lilacs are budded on California Privet which causes them to bloom right away and keeps them dwarfed. Most all varieties are double and very fragrant. (4-5 ft.) We offer the following varieties:

DESFONTAINES. Flowers large, double, violet-blue, in very large open clusters. A conspicuous variety of excellent growth characteristics and a good clear color.

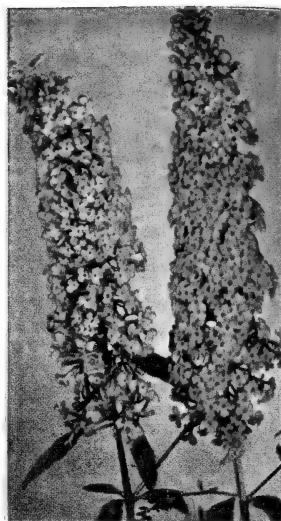

EMILE LEMOINE. Double well formed flowers of medium size in large open clusters. As near an approach to pure pink as is usually found in Lilacs.

HUGO KOSTER. Single, bluish-violet to light reddish-purple, flowers and clusters both very large. One of the best of the single Lilacs, distinct and attractive.

LUDWIG SPAETH. Flowers single, large, in large, well-filled clusters; very deep maroon-red. Very free-blooming and of strong, thrifty growth. A very popular variety. Best all-around single dark lilac.

MME. CASIMIR PERIER. Large, double creamy white flowers in large, well-filled clusters. A very satisfactory double white that may be depended upon to bloom freely each year.

WALDECK-ROUSSEAU. Double flowers of medium size in large, long, many-branched clusters; deep violet, darker within than without. Very pleasing.

Charming Ile de France

Ludwig Spaeth

Desfontaines

Hydrangea P. G.

Two New BUDDLEIAS

The late Summer Lilac. Resembles Lilac in shape and appearance. Long slender spikes throughout late Summer and Fall. (4-5 ft.)

CHARMING. Long sprays of lavender pink.

ILE DE FRANCE. Violet purple and very fragrant.

Strong, 2 yr., 2 to 3 ft. blooming size
65c. each, 3 for \$1.80, 10 for \$5.50

HYDRANGEA P. G.

Tall and stately shrub. Bending over with top-heavy, cone-shaped flowers that are first white, then pink, and in late Fall, copper. A giant bouquet in itself. (4 ft.)

2 yr., 2-3 ft. size
65c. each, 3 for \$1.80, 10 for \$5.50

DAZZLING

Red-Leaf BARBERRY

Identical with the green Barberry except for its startling bright red leaves. Requires direct sunlight for best color. (3-4 ft.)

2 yr., 2-3 ft. size
65c. each, 3 for \$1.80, 10 for \$5.50

New Gold-flame Honeysuckle

Gold-Flame Honeysuckle

From June until freezing, this magnificent plant is covered with showy clusters of large, fragrant flowers, rosy-flame outside and gold inside. The attractive foliage, a rich blue-green, makes a perfect background for the brilliant flowers. Hardy, healthy, easy-to-grow it thrives North, South, East and West, in full sun or partial shade. It can be used in so many places—trellis, porch, pergola, fence, fine for covering bank or cave. **Our big, 2-year plants will bloom this Summer.**

75c. each

Bleedingheart

Kelly's Hardy PERENNIAL Specialties

*Big Hardy, Field Grown
Will Bloom this Summer!*

BLEEDINGHEART

(Dicentra)

EXIMIA (The Fringed Bleedingheart).

Dainty, rose-pink flowers in drooping racemes. Finely cut, fern-like foliage. May through August. Full shade or sun. 15 in. 40c. each, 3 for \$1.10.

Mrs. Pierre S. du Pont III

HARDY PHLOX

Most popular of perennials, these lovely Phlox will enhance the beauty of your home grounds from Midsummer to late Fall. We offer this season a complete list of colors to make spots of brilliancy in the largest or smallest flower border.

40c. each, 3 for \$1.10

ADMIRAL. Reddish pink, very large trusses.
ANNIE LAURIE. Rich, deep salmon. Large trusses.

BEACON. Brilliant cherry-red. Tall.

BREAK O'MORN. New. Delicate pink with red eye.

COUNT ZEPPELIN. Pure white; vermilion-red eye.

INNOCENCE. Pure white; large. Tall.

MARY LOUISE. Medium height. Snow white.

SUNSHINE. Salmon-rose; fine deep shade.

PLEASE NOTE

All Perennials are sent separately from the rest of your order. Postpaid. Early in May.

HARDY CHRYSANTHEMUMS

Chrysanthemums! Those lovely Fall blooms to prolong your flower season until the arrival of Winter! Our list of "Mums" is, this season, at its peak, and we have selected only those sorts which have seemed to us outstanding in beauty, hardiness, and desirability. Try some of these gorgeous flowers and make yourself an Autumnal garden unsurpassed in your neighborhood.

Strong Field Grown Clumps

45c. each, 3 for \$1.20 (except where noted)

BURGUNDY. Rich cerise crimson, acquiring deeper tones in the center as the bloom matures.

Large, double flowers and carried on erect branching stems.

EUGENE WANDER. Big, brilliant, golden yellow clusters of flowers. Stocky plant, about 18 in. high. A new, wonderful Mum. In full bloom by September 20th. 50c. each, 3 for \$1.40.

LAVENDER LADY. Lovely, silvery lavender.

MRS. PIERRE S. DU PONT III. Luminous, soft peach, tinted with rosy-salmon; an indescribably gorgeous Mum. October. 50c. each, 3 for \$1.40.

ROSE GLOW. A Raspberry-rose color shading to an opalescent rose. Semi-double flowers, produced in abundance on slender, branching sprays.

POPULAR CUSHION MUMS

40c. each, 3 for \$1.10

Dwarf mounds with wholesale quantities of double flowers from Midsummer until hard freezes. Entirely hardy and long-lived.

BRONZE CUSHION. Coppery bronze flowers.

RED CUSHION. Red flowers.

KING CUSHION. Brick red flowers.

YELLOW CUSHION. Bright golden yellow.

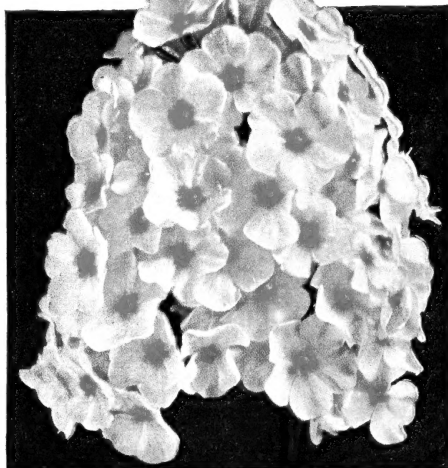

PINK CUSHION. Bright pink flowers.

WHITE CUSHION. White flowers.

DELPHINIUM, Cliveden Beauty

BELLADONNA IMPROVED (Cliveden Beauty). A real improvement on this lovely Larkspur. Produces a profusion of graceful spikes of pale blue blooms which are much prized for cutting. They appear in June and again in September.

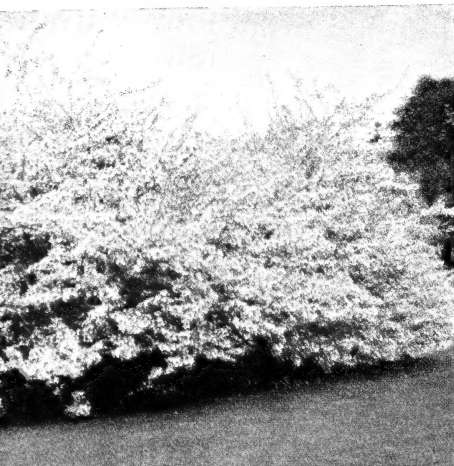

40c. each, 3 for \$1.10

Break o'Morn Phlox

Mountain Ash

Malus Floribunda

Malus Floribunda

This small tree is round topped with single carmine buds that change to pink and then white. Very heavy blossomer with small fruit of blood red. Will stand severe Winters and drought. (15-20 ft.)

2 yr., 4 to 5 ft., \$1.25 each

Flowering Crab Trees

The Flowering Crabs mark the pinnacle of the grand rush of Spring blooms and in Fall dazzle us with their Autumn colors of green, red, yellow and purple leaves. Prefer moist, rich soil.

2 yr., 4 to 5 ft. trees \$1.25 each

HOPA. Pink flowers turn to bright red in early Spring and in the late Fall the fruit clusters turn bright red. (15-20 ft.)

ELEYI. Deep pink single flowers against the dark red leaves in the Spring make this handsome specimen one of the most desirable. Its large red fruit gives it sheer beauty in late Summer. (15-20 ft.)

REDVEIN. With brownish red leaves that are smooth and shiny, this tree is very attractive even when not in bloom. Fruit, flowers, twigs and even the center wood are red. (15-20 ft.)

—**PRUNUS TRILOBA (Rose Tree of China)**—
With its rose-like pink flowers in May, this is truly like a Rose tree. Spreading tree like, it blooms in May. (6-10 ft.) 2 to 3 ft. trees, 75c. each

Kelly's Shade

Numbers in parentheses indicate approximate height at maturity

Mountain Ash (European)

Who has failed to admire the heavy drooping clusters of bright red berries against a background of soft green foliage. A most popular tree in America as it is in Europe. Used as bird bait in France. Most common in cemeteries of Wales. Witch-dispeller in most of Europe and is the Rowantree of which the British sing. Will grow in any soil. (18-25 ft.)

6 to 8 ft. size, \$2.25 each

White Flowering Dogwood

A truly great American tree. Large white, 4-leaf clover-like blossoms sometimes measure 6 inches across. In Fall the crimson berries literally cover it in a blaze of color. Fall leaf color is sufficient to make this popular. Will grow in shade or full sun. Not particular as to soil. (20-25 ft.)

3 to 4 ft. trees, \$1.75 each

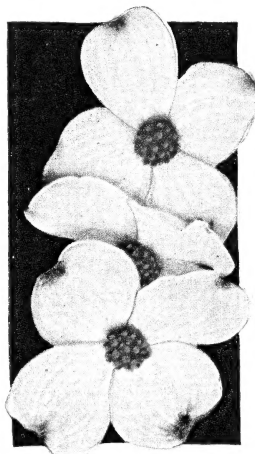

Magnolia Soulangiana

Special Magnolia Tree Offer (Saucer Magnolia)

One of the most hardy of the Magnolias. Mammoth rose-colored blossoms resemble a cup and saucer of flower petals. Blooms in early Spring before the leaves appear. Blooms when very small, but will get to be about 10 feet tall. Makes an excellent specimen for lawn. (10-15 ft.)

2 ft. size.....\$1.50 each

3 ft. size.....\$2.25 each

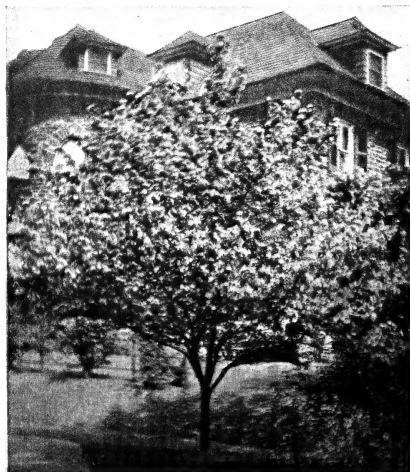

White Flowering Dogwood

Flowering Plum

(Prunus Newport)

Small growing tree or large shrub retains its purple foliage during the entire season and has small red fruits in late Summer. Gives excellent foliage contrast in a shrub border. (8-10 ft.)

3 to 4 ft. size, \$1.00 each

Flowering Plum

and Ornamental Trees

Norway Maple

DWARF REDLEAF MAPLE. A real Maple that grows no taller than 8 to 10 ft. Leaves are a startling crimson all Summer. Makes an excellent specimen for side yard or in formal garden. Gives a most satisfying effect when planted in front of or in an evergreen planting. Has best color when in full sun, but will tolerate moderate shade. (8-10 ft.) **1½ to 2½ ft., \$3.00 each.**

PAULS DOUBLE SCARLET THORN. The double button-like flowers of this tree give it the effect of a large rose growing the size of a tree. The limbs are covered with the brilliant red flowers in May or June. (12-15 ft.) **4 to 5 ft. \$2.00 each.**

LOMBARDY POPLAR. A few of these in your border planting will give the effect of a portion of the Old World right here in America. Makes an excellent windbreak and forms a perfect backdrop for lawn or garden. Tall, fast growing, spire-like trees. (40-60 ft.) **4 to 5 ft. 75c. each, 10 for \$6.00; 6 to 8 ft. trees, \$1.00 each, 10 for \$9.50.**

Willow, Babylon Weeping

TREE HYDRANGEA (Treeform Hydrangea Peegee). Same as the shrub Peegee, except it has a single trunk and grows taller with larger blooms. Make excellent specimens for the lawn. (8-10 ft.) **3 to 4 ft. trees, \$1.50 each.**

EUROPEAN WHITE BIRCH. Three White Birch trunks from one root system. These clumps are the same as those that have made the Berkshires famous. They give a most natural effect to the home grounds. (40-50 ft.) **2 to 3 ft. trees, clumps of three, \$1.75 each.**

SUGAR MAPLE (Hard Maple). While the bloom is not noticeable, the scarlet, orange and yellow foliage in the Fall more than make up for this lack. This tree is the source of most Maple Sugar. This rugged individual will stand time, storms and severe temperatures without flinching for a moment. (50-60 ft.) **6 to 8 ft. \$2.00 each.**

CHINESE ELM

FOR QUICK GROWTH (30-40 ft.)—A very rapid grower with small dense foliage. Resembles Norway Maple in shape. Excellent for tall hedge and windbreak.

Because of its beauty and extremely rapid growth, the Chinese Elm has become the leading shade tree of America. It is planted in every state, standing intense cold and extreme heat extremely well. Under ordinary conditions, it makes excellent shade in five short years, as its average growth is 5 feet a year. It is by far the fastest growing hard-wooded shade tree.

6 to 8 ft. branched trees, \$2.00 each; 8 to 10 ft. \$2.75 each

AMERICAN ELM. This old reliable favorite of field and garden is one of nature's landmarks, because they withstand the ravages of time and storm. Vase-shaped top which is open sufficiently to allow the grass to grow well beneath it. (60-100 ft.) **6 to 8 ft. \$2.00 each, 3 for \$5.50.**

BECHTEL'S FLOWERING CRAB. This medium grower has double rose shaped pink flowers in May. Is very hardy and will grow in almost any soil. Blooms when very young. (8-12 ft.) **2 to 3 ft. \$1.25 each, 3 to 4 ft. \$1.75 each.**

CAROLINA POPLAR. One of the best known and easiest to grow of all the shade trees. Is extremely hardy and will grow in any soil; large, shiny leaves rustle with the slightest breeze. (50-60 ft.) **6 to 8 ft. 75c., 10 for \$7.00; 8 to 10 ft. \$1.25, 10 for \$10.00.**

CATALPA Bungei. A very formal tree with large, heart-shaped leaves which grows in a round ball of leaves on top of the trunk. Excellent for lining drives and as specimens on the lawn. Easy to grow and tough. (6-8 ft.) **6 to 8 ft. \$2.25 each.**

CUT-LEAF WEEPING BIRCH. This stately white trunked weeping tree has delicate thread-like branchlets that weep in long strings to the ground. One of America's most beautiful shade trees. (20-30 ft.) **6 to 8 ft., \$2.50 each.**

DOWNING MULBERRY. This is a most versatile tree, because it is not only a fairly rapid grower of great beauty, but also produces most delicious raspberry shaped fruits that are excellent for pie and sauce. Can be used as a decoy to get birds away from Cherries and other small fruits, because birds prefer the Mulberry to any other fruit, which ripens in June. (15-25 ft.) **5 to 6 ft. trees, \$1.25 each.**

JUDAS TREE, or RED BUD. This old variety of distinctly American origin greeted the first settlers from the edge of the forests. Fable tells us that when Judas betrayed Christ this tree immediately dripped all over with drops of blood. And that is the way it looks today when its blooms first come out. Later they turn into beautiful rosy-purple flowers. Blossoms in April, before the leaves appear. (15-20 ft.) **3 to 5 ft., \$1.00 each.**

SILVER LEAF MAPLE. Most rapid grower of all the Maples. The underside of the leaves has a silvery cast and the bark is silvery. Large spreading tree. Sap good for sugar making. (60-70 ft.) **6 to 7 ft. \$1.50 each, 8 to 10 ft. \$2.00 each.**

NORWAY MAPLE. Its broad and dense head give very heavy shade. This versatile tree will grow well in adverse city conditions and also will do well at the seashore. (60-70 ft.) **6 to 8 ft. size \$2.00 each, 8 to 10 ft. size \$3.00 each, 10 to 12 ft. size \$3.75 each.**

WEEPING WILLOW (Babylonica) This native of China has been taken into the hearts of America because of its very graceful drooping branches that sweep the ground. This tree was chosen to mark the grave of Napoleon at St. Helena. (25-30 ft.) **6 to 8 ft. \$1.25 each, 3 for \$3.25.**

PUSSY WILLOW (French). No bouquet would be complete in early Spring without a few sprays of this Pussy Willow. Catkins are at least twice as large as those of the common American Willow. (10-12 ft.) **3 to 4 ft. 75c. each.**

Evergreens

If you are planning to set out Evergreen Trees this year, please send a post card for our Special Evergreen Price List, or send your list of wants for special quotations. We are growing a complete assortment of the leading varieties in many sizes.

Chinese Elm

Old Glory

A New

Strawberry OF GREAT MERIT

An Everbearing Strawberry with the fine qualities that makes it one of the finest Strawberries for the home.

Set out in the Spring they will bear all Summer and up to severe frost. They will bear again in the Spring and again the next Fall. Berries are firm, deep red all the way through and "honey-sweet" in flavor. Does well in any location and is a variety suitable for the small garden as well as the

large grower. Plant "Old Glory" this Spring and enjoy luscious berries over the longest possible season. Heaviest yielder of all Everbearers we have tested.

Other Luscious STRAWBERRIES

All Strawberries Sent Postpaid or Express Prepaid

PREMIER. An early, productive variety of unsurpassed quality. Does well on poor soil. Berries large, evenly matured, light bright red. Excellent for market or home use.

FAIRFAX. Another excellent new variety, ripening early, about the same time as Premier. Very vigorous and a fine plant maker.

CATSKILL. Plants large, very vigorous, yield very heavy crops. Berries very large, lightly irregular in shape, moderately firm, dark red, but glossy and attractive, mild subacid and good quality.

Prices of the above Plants: 25 plants \$1.25, 50 plants \$1.75, 100 plants \$3.00, 500 plants \$9.00, 1000 plants \$14.00 Postpaid

Everbearing Strawberries

ROBINSON. The elite of all June bearing varieties of Strawberries. Heavy yielder of large, brilliant red, more uniform in size than any other June bearing variety. Shape of berry more round than conical; 3 to 4 days later than Premier. The Robinson brought \$3.00 per crate on the Benton Harbor market, the world's largest growers market.

GEM. Very hardy, produces plants freely. Berry is dark red, large, sweetish tart flavor. Plants medium in size and immune to disease.

Prices of the above Plants: 25 plants \$2.00, 50 plants \$3.15, 100 plants \$5.00, 500 plants \$16.75 Postpaid

NOTE—All varieties we offer are perfect flowering and therefore can be planted alone. However to have Strawberries over a long season, it is best to plant more than one variety.
